

Premium Cold Pressed Oils for the Nutritional Supplements and Cosmetics Industries

## About us

MediVega<sup>™</sup> seed oils are gently cold pressed in our parent company's – N.S Oils – facility. N.S Oils produces a range of select, 100% pure, cold pressed oils, combining traditional processes with meticulous scientific innovation, enabling the preservation of vitamins, minerals, active ingredients and fatty acids, for use in cosmetics, food, nutritional supplements and pharmaceuticals.

The factory is situated close to the growing fields in the enchanting Negev Desert. The entire process from sowing, supervising growth, quality, gathering, and the transfer of the seeds to the factory is overseen by N.S Oils experts. The oils are produced to the highest international standards with various certifications including organic, Kosher, and Halal certification. N.S Oils is committed to sustainability, traceability, and transparency across the entire supply chain including a blockchain program for cosmetic ingredients.

MediVega<sup>™</sup> seed oils are used in functional foods, dietary supplements, cosmetics, personal care, and pharmaceutical formulations. MediVega oils are sourced from many different types of seeds, including pomegranate, black seed (black cumin), milk thistle, and jojoba.

Our seeds and nuts are harvested throughout the region, and the oils are gently coldpressed in our parent company N.S Oils facility. The extraction process is natural, without the use of chemical solvents, and N.S Oils is a certified organic facility.
