About

Arugot

Organic wellness

Arugot is a natural lifestyle brand for a genuinely healthy, pure and quality lifestyle, that grew out of the garden and in the kitchen, from the daily life of Esther Lachman – pharmacist, clinical herbalist, nutrition and health consultant. Our products were created out of deep familiarity with herbs and female strength. The experience of healing aromas and textures rich in the products speaks for itself - to introduce pure nature into the body, to recognize true beauty and vitality within you. We believe that in the realm of nature there are all the forces that bring your body to its maximum beauty, health and Vitality. Our flowers and plants are mostly picked at our medicinal herb farm in Moshav Shuva, and all of our organic oils are cold-pressed and of the highest quality.

All of our products are manufactured in our local plant, containing 100% pure, organic and healthy nature. We have invested a great deal of effort in every product so that it will be the most efficient, active and rich in raw materials that really make a change.

Real Cosmetics for Real Women

Arugot is spearheading a revolution in cultural consciousness in that we do not produce photos with models. Our photography productions, and all the recommendations on the site are all authentic and come from women of all ages, all weights and all shades of female beauty. We believe that cultural change begins with small, everyday decisions to support natural organic cosmetics that believe that beauty and health are ours and that female sanity for young women and ourselves is to maintain it on a daily basis.
