Let nature back indoors

Product Line

2022-3

Spray Line

An easy way to balance your immediate surroundings while on the go. Enviro-Biotics® spray comes in different sizes to suit your traveling needs for trains, automobiles, hotels rooms, and other indoor space. The Travel Spray is allowed as a carry on onboard airplanes.

The Enviro-Biotics® sprays are available in 4 convenient containers:

PET SPRAY 250 ml (8.45 oz) spray tubes

ENVIRO BOOST 200 ml (6.8 fl oz) spray bottle

ENVIRO BOOST 150 ml (5.07 fl oz)

TRAVEL SPRAY 100 ml (3.38 oz) spray tubes

BioLogic Mini

A portable, rechargeable device is suitable for spaces up to 30 square meters, such as bedrooms, personal offices, and automobiles.

The device operated in 2 modes :

A) Continuous fogging for the initial fast impact of places treated for the first time and need an immediate impact

B) Automatic Dispersion – the device automatically disperses every hour, keeping the treated areas safe and protected

The device contains a 45ml (1.53 oz) refill of Enviro-Biotics®, providing app 90 days of continuous operation in its automatic mode.

Dimension:

Height: 12.3 cm

Diameter: 5 cm

Weight: 187 grams with a full refill

Working voltage: 5v DC

Battery Capacity: 1000 mAh

Input -C-Type USB (5v charger not provided)

BioLogic

The BioLogic is a portable, rechargeable device suitable for spaces in large rooms up to 50 square meters. The device automatically disperses every hour, keeping the treated areas safe and protected. You may review and control operations via a smartphone app.

The device contains a 75ml (2.54 oz) refill of Enviro-Biotics®, providing approximately 90 days of continuous operation.

Dimension:

Height: 19 cm

Diameter: 7 cm

Weight: 400 grams when with a full refill

Power Supply: working voltage: 5v DC

Battery Capacity: 2000 mAh

Input -C-Type USB (5v charger not provided)

Biotica - 800

The device is the largest and most powerful of the stand-alone (non-HVAC) SOHO line, designed to cover 80 square meters effectively of central halls (such as living rooms and other types of common areas)

Its 105ML cartridges last approximately 80-100 days.

Dimensions 25 x 9.7 x 5.3 cm

Weight: 187 grams with a full cartridge

Input: AC 100-240V 0.3A 50/60Hz

Output: 4.2v 1A

BA-2080

The ALL IN ONE

Hybrid Purification System

The only device with “Dual Engine” for multi-dimensions entire indoors air filtering and surfaces’ bio-cleaning

- 1) A powerful Air filter device equipped with H13 or H14 providing a HEPA technology of more than 600 CADR
- 2) Embedded Enviro-Biotics dispersion system

Both engines use sensor readings of contamination levels to automatically adjust the intensity of operations

The HEPA filter is to be replaced every 12 months, and 300ML refill bottles every six months

Power supply requirements: 100~120Vac/50~60Hz or 220~240Vac/50~60Hz

Net weight (Kg) 11

Dimensions (HxWxDcm) 31 x 31 x 76.15

BA - 1200

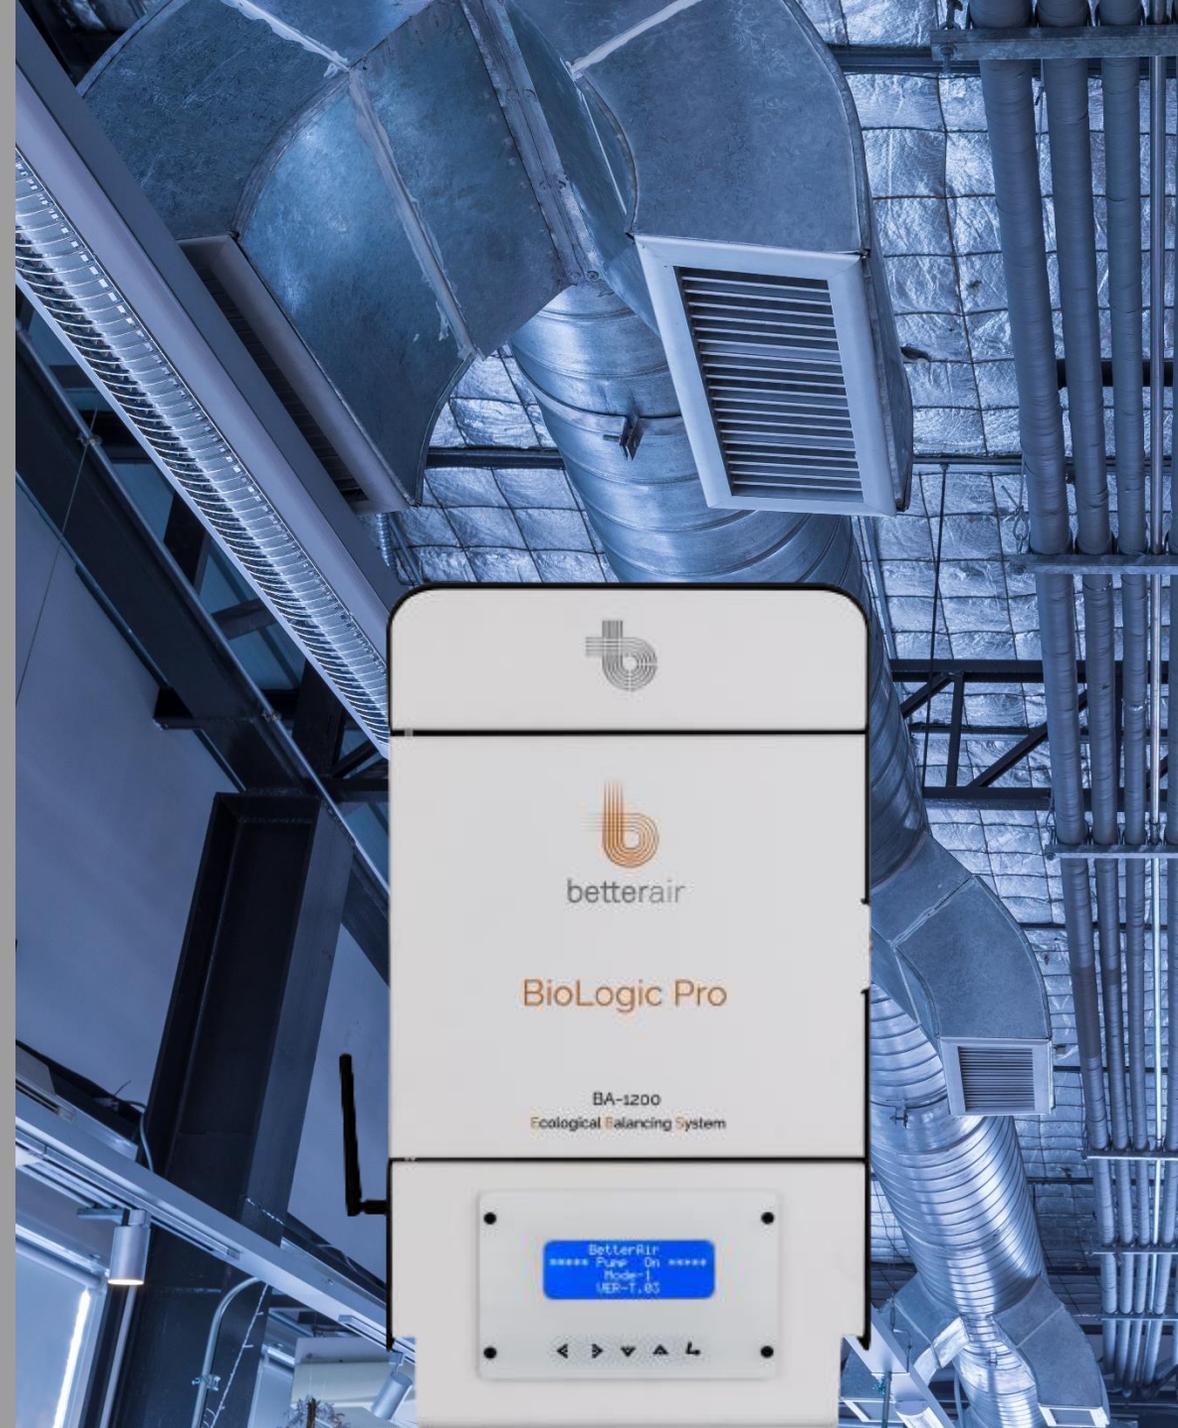

The BA-1200 is the industrial line's compact device. A programmable, automated device that utilizes a sensor-based algorithm to ensure an optimal distribution of Enviro-Biotics® via HVACs.

Our patented design provides an in-depth microbial bio-cleansing of highly contaminated HVAC ducts, transforming HVACs from being the main contributor of Building Related Illnesses (BRI) to an effective method of spreading Enviro- Biotics® that purifies entire facilities.

The BA-1200 is built with a robust metal chassis. The installation is easy and quick, providing ideal coverage for small-medium-size facilities.

The BA-1200 covers an area of up to 1250 sqm (12,500 sqf.), using a 500 ml (17 oz) bottle of Enviro-Biotics®
Dimensions: L 18 x H 39 x W 13 cm (7 X 15 X 5 Inch)

The industrial devices operate on 12V and contain an air pump that Disperses liquids using the venturi method.

BA-1200 specs

Power in	12V DC 2A
Plug	DC Jack
Energy consumption	
Power (compressor on)	15w
Standby	0.5w
Panel	
Display	20x4 STN Blue LCD
Touch panel	5 Channel Capacitive Touch Sensor
Power supply	
INPUT AC PLUG	EU / US
Input-	100-240V AC 0.6A Max
Frequency	50/60Hz
Output-	12vDC 2A 24W
DC cable:	1.5M
DC connector	DC Jack: 2.1mm

BA - 1800

Robustly built in a metal-enclosed chassis for employment in machine rooms, the BA-1800 is the industrial line's largest device.

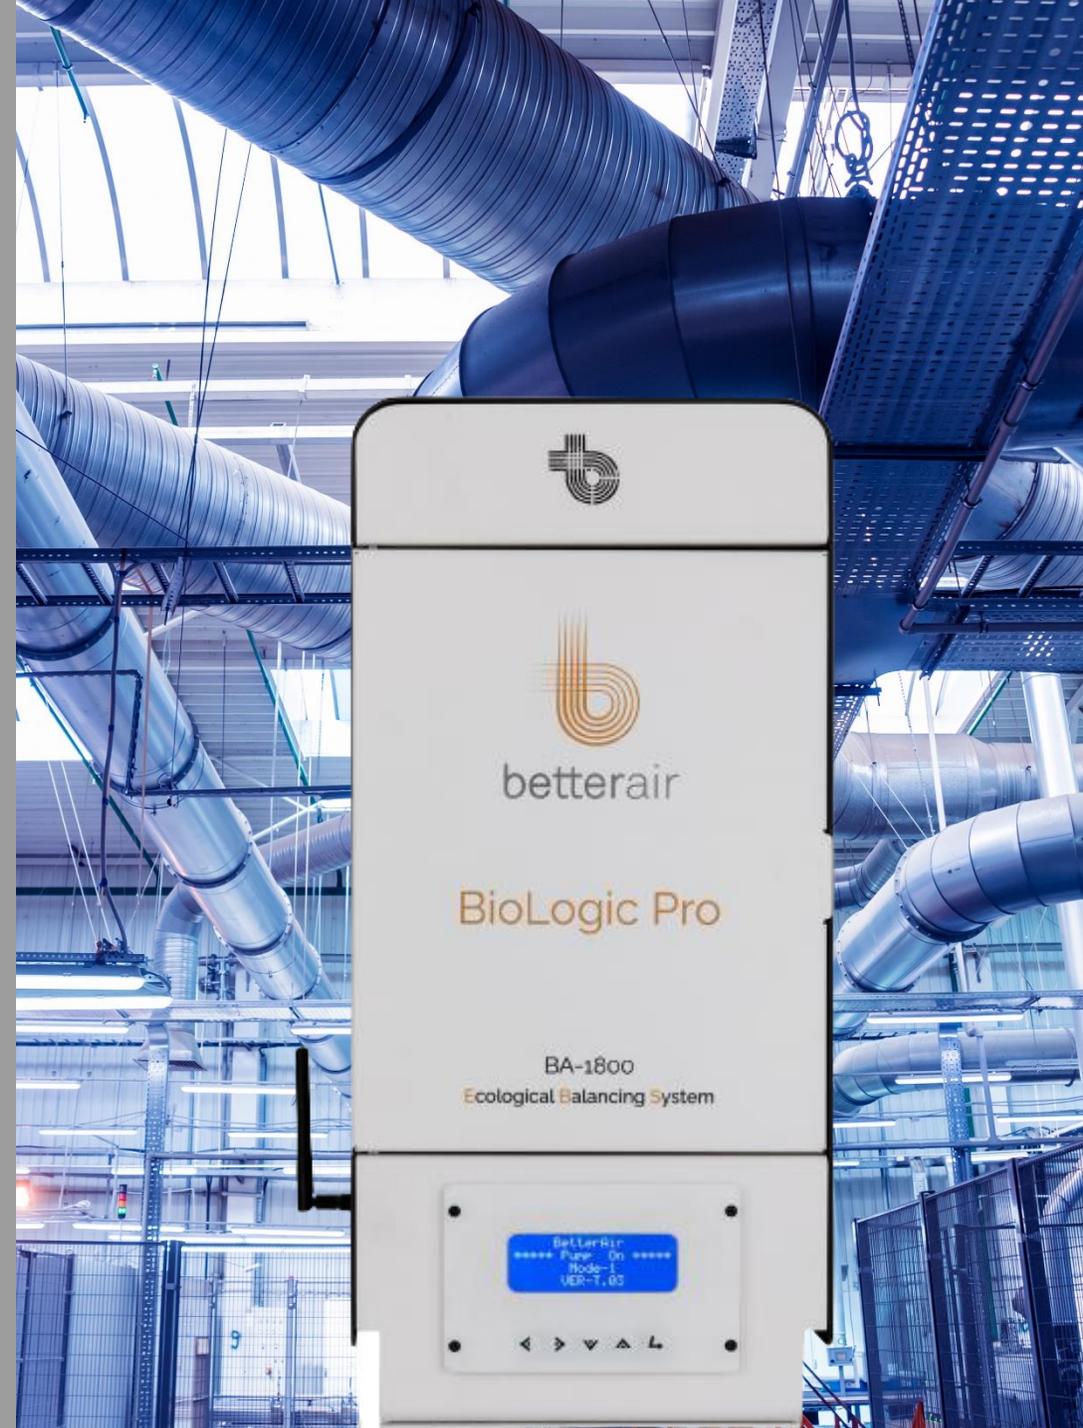

The BA-1800 is an automated, programmable device that utilizes a sensors-based algorithm to ensure an optimal distribution of Enviro-Biotics® via HVACs.

Our patented design provides an in-depth microbial bio-cleansing of highly contaminated HVAC ducts, transforming HVACs from being the main contributor of Building Related Illness (BRI) to an effective method of spreading Enviro-Biotics® that purifies entire facilities.

The BA-1800 installation is easy and quick, providing ideal coverage for large facilities. The BA-1800 should cover an area of up to 2,500 sqm (25,000 sqf).

Dimensions: L 22 x H 49 x W 19 cm (9 x 19 x 7.5 Inch)

The industrial devices operate on 12V and contain an air pump that disperses liquids using the venturi method.

Fogger System - BAPF-18

A portable battery-operated powerful fogging device for initial treatment of indoor space that requires immediate impact.

The device has three modes of operation where the rate and strength of dispersion may be set.

A retractable, rechargeable battery allows smooth field replacement for long uninterrupted service.

The device handles 250ML and 500ML refills.

Battery working time: 60mins@gear2

- Noisy level: <60DB
- Adjustable speed
- Type-C chargeable battery pack
- Dual battery pack
- Removable hanging straps
