

The Sindyanna Visitor Center

Our beautiful sustainably built Visitor Center is a place where Jewish and Arab women work in equality and mutual respect. The center welcomes tourists from abroad as well as Israelis. Its spaces are suitable for a wide range of activities such as olive oil tastings, special lunches offering traditional cuisine, basket weaving workshops and Hydroponic farming workshops.

Taking Fair Trade Even Further

Sindyanna of Galilee, a nonprofit run by Jewish and Arab women, is an attempt to embody the model of a just society. It was founded in 1996 to promote economic opportunities for Arab women, to strengthen Jewish-Arab cooperation, to advance Fair Trade, and to encourage sustainable agriculture. All profits go back into the community, creating bridges between people.

How Can Olive Oil

CREATE
HOPE

SINDYANNA
OF GALILEE

Our Award-Winning Fair-Trade Olive Oils

The olive trees of Galilee have produced liquid gold for millennia. Sindyanna cultivates the only organic plots in the Arab sector. We are proud to be part of this time-honored legacy while taking it further. Combining Fair-Trade, local traditions, modern know-how, and the best olive cultivars, we create well balanced oils of distinct character, with satisfying bitterness, tingling pungency, and piquancy that follows through on the palate. Our Fair-Trade strains include Organic olive oil, Barne'a, Coratina, and a House Blend, which mixes Barne'a, Coratina and Picual cultivars.

Visit us:

Sindyanna is located in Kfar Kanna (Cana), a short distance from Nazareth and from the churches associated with the miracle of turning water into wine.

The village attracts hundreds of thousands of visitors each year.

Give Someone the Gift of Extra Hope

Among our fair-trade products are organic and extra virgin olive oils, za'atar spice mixes, carob syrup, almonds, honey, olive oil soaps and various traditional handicrafts. Our colorful packaging was inspired by the drawings of the children of Sindyanna employees to promote peace, collaboration and hope.

Women Go Green!

Since 2019, with the aid of Sindyanna, 30 women in the villages of Baqa Al Gharbiya and Kafar Kana have been equipped with Hydroponic Systems. They have increased their food security while helping reduce gas emissions for a safer planet.
