

ESRUBBER

Company Profile

ESRUBBER

Industry know-how and advanced technologies

At ES RUBBER, we design, develop and manufacture superior rubber solutions for global industries — infrastructure, construction, transportation and automotive, water and sewage systems and tunneling. We take great pride in our track record of successful projects around the world.

ES RUBBER professionals work closely with our customers to develop and produce high-quality, durable products that meet exact requirements.

- ▲ In-house R&D, engineering, testing and QA to meet exact specifications and to guarantee accurate results
- ▲ Advanced manufacturing technologies for precise, high-quality products
- ▲ Extrusion, molding, performing, joints vulcanization, variety of reinforcements, curing technologies, flocking, surface treatments with adhesives and more.
- ▲ All manufacturing and control processes — from compounding to finished product — In house under one roof
- ▲ Full-service technical and customer support throughout the entire process
- ▲ Integrated Quality Management certified to ISO 9001:2015, ISO 14001:2015, ISO18001:2007
- ▲ Certified to IATF 16949

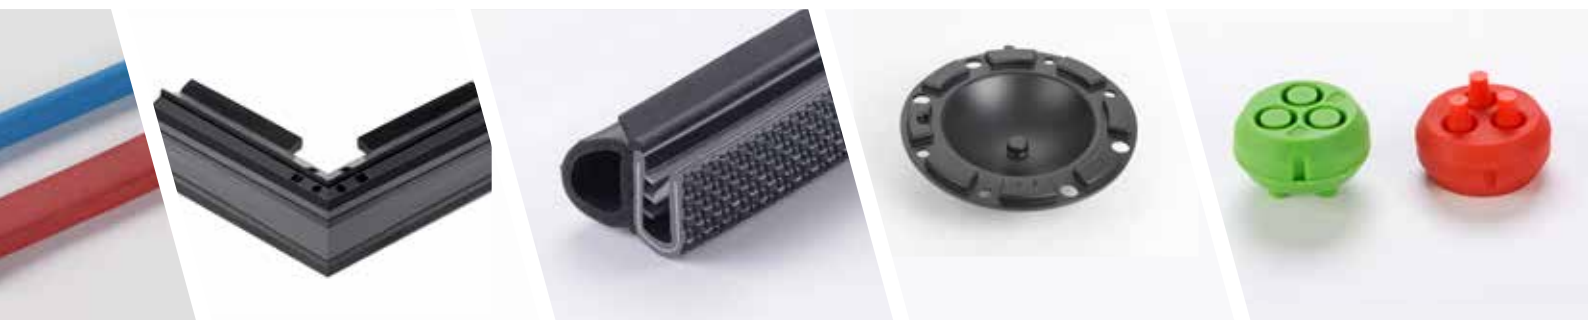

Ein Shemer Industries

Since 1968, Ein Shemer Industries has designed, developed and manufactured superior rubber solutions for local and global industries. Utilizing a broad range of materials and compounds, and state-of-the-art equipment, Ein Shemer Industries develops thousands of rubber products.

Profily

Located in the Czech Republic, Profily has designed and manufactured superior extruded rubber sealing for various applications since 1996. With thousands of die tools produced by the company, Profily customers can choose from an impressive array of custom and off-the-shelf profiles.

Our vast range of materials

EPDM • SBR • NBR • HNBR • NR • BR • CR • CSM
• CM • FKM (Viton®) • silicone rubber • FVMQ
(fluorosilicone) • PVC • TPE • EPDM (sponge)

Putting quality first

ES RUBBER conforms to international standards for quality. Our in-house quality assurance teams perform regular tests and checks on equipment and products and keep certifications up to date. At ES RUBBER, products undergo stringent quality and reliability testing in accordance with BS, DIN, EN, SAE, ISO, KTW, NEN, NSF, STUVA, AFTES.

Marketing around the globe

We have built trusted, long-lasting relationships with our customers around the world. Our professional sales and expert technical teams provide ongoing support throughout the entire process from design and development to production and shipping.
