

Make Your Skin Go Back in Time

“Fountain of Youth”

Regenerating - DermoCosmetic line

Developed by Dr. Orit Bossi

ORCHID GREEN
FOUNTAIN OF YOUTH

About the Product:

Line of revolutionary and innovative Anti-aging products to treat and prevent wrinkle formation and provide a young and radiant look.

AAPE1 is a revolutionary patent pending formula. The products in the line are based on AAPE1- a very unique and powerful antioxidant and Anti-aging formula.

Skin aging, skin wrinkling, skin pigmentation and in some cases skin cancer is accelerated, among other factors, by the generation of free radicals during exposure to UV/sun or air pollution.

Orchid Green's Anti-aging products are based on antioxidants that target the free radicals that accelerate the skin aging process. Most natural water soluble antioxidants such as vitamin C, E EGCG, cannot provide overtime protection against free radicals neither can block wrinkle formation. AAPE1 is water soluble and chemically stable so it protects your skin against the harmful effects of UV/sun exposure and air pollution for 24 hours.

The products in the line:

- [Treat existing wrinkles.](#)
- [Prevent new wrinkle formation.](#)
- [Protect against free radicals generated as a result of UV Exposure and Air Pollution.](#)

The natural formula was developed after years of research performed by Dr. Orit Bossi, neuroscientist and skin aging specialist. AAPE1 was developed using new technology that gives the formula its chemical stability and therefore its long lasting activity (over 24 hours).

The products treat dry/very dry skin and provide moisture to the skin as a result the skin look elastic, young, radiant and smooth.

The formula is able to prevent collagen and elastin degradation thus, preventing wrinkle formation and premature skin aging.

In addition, the whole line is based on "SAFE COSMETICS" and is on the "GREEN" and "VEGAN" CATEGORY.

The AAPE1 formula in the line is FDA approved and it is PATENT PENDING.

Advantage of the products:

- Prevent wrinkles and fine lines formation.
- Help achieve an even skin tone based on AAPE1.
- Treat wrinkles and fine lines.
- Protect against skin damage caused by sun/UV exposure and air pollution.
- Provide long lasting protection – up to 24 hours.
- Protect from free radicals and are a powerful antioxidant.
- Give the skin a young and glowing look.
- Are **green, vegan**, and considered "**safe cosmetics products**".
Do not contain parabens, petrol products, dyes, SLS or silicones.

What will you experience using these products?

Within the first days of use you will notice changes in the skin's appearance. Your skin will look more radiant, glowing and young. This is due to the nourishing active ingredients contained in the products.

After two weeks you will see a significant change in the skin's texture. Less appearance of fine wrinkles.

After one month of using the products the skin will look smoother, younger and with significantly reduced skin wrinkles and pigmentation. Consistent use protects the skin from skin damage and skin aging and prevents the formation of new ones.

* This line is recommended by **aesthetic doctors** since it helps preserve the treatments for longer period of time.

From the Media:

- It looks as if a new skin cream by Dr. Orit Bossi could not only make people retain their youthful image, but also protect people's skin against harmful UV rays. But what separates this cream out from similar products may reside in the fact that it can outlast its competition. The new antioxidant, according to Dr. Bossi, is stable in high temperatures, soluble in water and does not easily oxidize, allowing it to retain its efficacy over a long period. "Sunscreens merely protect the skin from much of the harm of UV rays, this antioxidant retards the aging of the skin. In addition, unlike cosmetic preparations, discovery deals with the deepest layers of the skin and not only the epidermis". Dr. Bossi said (Jerusalem Post).
- Israeli researcher finds solution to wrinkles. A pioneering way to prevent wrinkles. Dr. Orit Bossi of Hebrew University has developed a plant-based antioxidant that does not oxidate quickly, is impervious to high temperatures and retards the breakdown of collagen and elastin in the skin. (Israel Today).

Women tell:

Sivan, 31

I did not believe in the use of cosmetic creams until I started to use "Fountain of Youth" Regenerating line. I noticed amazing results, my skin was smoother and my skin tone was now even, despite my acne. I have decided to be consistent in using the products.

Merav, 47

I used many cosmetic products of many known brands but had not seen improvements in my skin texture or wrinkles. But since using ORCHID GREEN's Regenerating line, I believe this product repairs aged skin's appearance and also protects the skin from new wrinkles. Now my skin looks younger.

Rita, 61

I have used very luxurious anti-aging products over the years, but did not see any results or improvement in my skin's look or texture until I started using the Regenerating line. I was surprised by my skin's appearance. My wrinkles have been reduced, some even diminished, and I feel and look young again. I recommended these products to all my friends.
