# Babylon – translation @ a click!

Babylon translation software helps you understand the world.

Instantly translate any word that appears on your screen with a single mouse click.

Babylon allows you to translate text and documents in dozens of languages.

Our Premium features include Encyclopedias and Dictionaries from leading publishers, as well as Human Voice pronunciation and more.

Babylon – the perfect translation solution for every need!

Why Babylon?

Multilingual Communication: Babylon enables effective communication across language barriers, allowing individuals or businesses to engage with global audiences, clients, or partners.

Time Efficiency: Babylon significantly reduces the time required to translate documents, emails, or other written content compared to other translation services.

Accurate and Consistent: Babylon uses advanced algorithms and language databases to ensure accurate and consistent translations, reducing the risk of misinterpretation or errors.

Boost Productivity: Babylon's single click activation and intuitive user interface speeds up workflows and enables faster information exchange, improving overall productivity.

Diversity, Equity & Inclusion: Babylon removes barriers to global communication, ensuring cultural sensitivity and empowering individuals from diverse language backgrounds.

Customer Experience: For businesses serving international customers, Babylon ensures that product information, user interfaces and customer support materials are available in their preferred language, enhancing the customer experience.

Confidential and Secure: Babylon software offers enhanced data privacy and security solutions for sensitive or confidential information in corporate and government networks.

Customization and Integration: Babylon provides customization options and integration capabilities with other software or systems, facilitating seamless workflow integration.

Babylon translator - Main Features

OCR - Optical Character Recognition

Single-click activation provides the translation instantly - without leaving your current application, losing focus, and wasting time.

Dictionaries

Babylon offers dozens of dictionaries in most leading languages. You can also integrate premium dictionaries from leading publishers and have all sources available in one place.

Context Aware

Babylon can "understand" what users need based on contextual analysis. For example, if a user clicks on "state" in the phrase "state of the art", Babylon provides results for the whole phrase.

Text translation

Babylon allows immediate text translation in most leading languages. You can translate full sentences and paragraphs with a single click!

Document translation

With Babylon, you can translate full documents while keeping their original format. Word, Excel and PowerPoint documents are supported, as well as PDF files.

Human Voice

Babylon text-to-speech allows you to hear, and learn how to correctly pronounce, the text you are reading in various languages and accents.

Wikipedia results

Efficiently access Wikipedia's vast knowledge in multiple languages with just a click, expanding your understanding and global perspective.
