emaze Enterprise Suites

emaze, with 50+ million users and more than 120+ million digital pieces of content created, is your next online SaaS comprehensive enterprise portal. Our wide array of sophisticated tools adapts to your every business need.

Customizable Dashboard:

The **Homepage** can be segmented according to company needs, easily granting the ability to filter by department/user/sector/etc, as well as enabling each employee to navigate their own personalized portal in accordance with their role within the organization.

You're In Control:

You **control access** to all content while still adhering to upper management content rules and regulations. Real-time analytics allows users to track **Account-Based Marketing (ABM)** and analyze web presence data, and with the **emaze** Training, Info/Survey, and Certification Council (**TIC Council**) you can easily engage with prospects on a large scale enabling you to maximize opportunities and streamline business operations through quick recognition of flaws within your current processes.

How emaze Helps:

- Manages and protects data to ensure organizational compliance
- Improves collaboration and best practices by improving operational transparency between employees and management
- With the TIC Council easily send educational/deep learning information, forms, or even satisfaction surveys/feedback forms
- Ensure that employees are getting the proper coaching, training, information, certifications, and support they need from their leadership.
