

E&A FINANCIAL SOFTWARE

Product Suite for All in One Platform

New generation of trading innovations

CUTTING EDGE TECH, ANY DEVICE, ANYWHERE

All in One solution offers a unique and an all new trading experience. The concept of AIO is innovative and closely correlates with the new trends in the worlds of online trading in the world's largest banks.

This is not just an advanced technological solution. All in One is a perfect solution for retail users, is easy and intuitive for beginners, and is powerful enough for active traders.

All in one operates via the Internet, so you can log in and trade from anywhere and with any device.

No downloads, installations and complex setups are required.

It all started with the passion to build the world's best trading system and a skilled development team with many years of specialization in user interface and user experience.

Together we formed a groundbreaking, innovative and smart trading system.

By using the AIO solution suite, we enable a new and advanced trading experience – substantial added value, a large range of market data, financial ingenuity, and smart trading features.

All in one is an agile, smart and cutting-edge product that is constantly evolving.

KEY ADVANTAGES

1 White label HTML5 Trading Platform

Web-based platform - Adopting the trend of the world's leading banksto move from outdated internet sites to advanced trading systems. Our platform works on iOS, Android, Windows, and on any device - PC, TV, iPads, tablets, phones, etc.

2 Multi-Asset Solution

Trade in markets all over the world with wide range of various instruments in one solution: Equities, options & warrants, funds, bonds, ETFs derivatives Etc.

3 Front-End Suite

Web and mobile apps included. All in One meets all the requirements of information security, regulation and is accessible according to the law for those with special needs.

KEY ADVANTAGES

4 Advanced Trading Tools

AIO includes advanced orders, a strategy center, trading from charts, economic calendars, screeners, portfolio dashboard, alerts, professional technical analysis tools, auto complete search engine, twitter and news.

5 Multiple Languages

Our platform is available in different languages.

6 Data Solution

Connect our own propriety data feed to the All in One system. Save costs and resources by connecting to our data center without the need to direct to aggregators and data providers.

7 Latest Trading Technologies

Offer your retail clients and active traders the latest and hottest trading tech. Stay ahead of the competition and gain a competitive advantage. In addition to the basic trading orders and tools, AIO has "Advanced Order Types" and "Conditional orders". This ensure better prices and enable a greater control on the way the order is placed in the market.

8 Integration and Resource Utilization

During the implementation of the project, we will take advantage of the experience we have accumulated as a company in the development of our full range of trading solutions that is based on the experience we have gained over years of implementing trading systems for clients in banks and financial organizations. This will increase the efficiency and ROI for your organization.
