

# Transforming Primary Care

Fulfilling the promise of telehealth

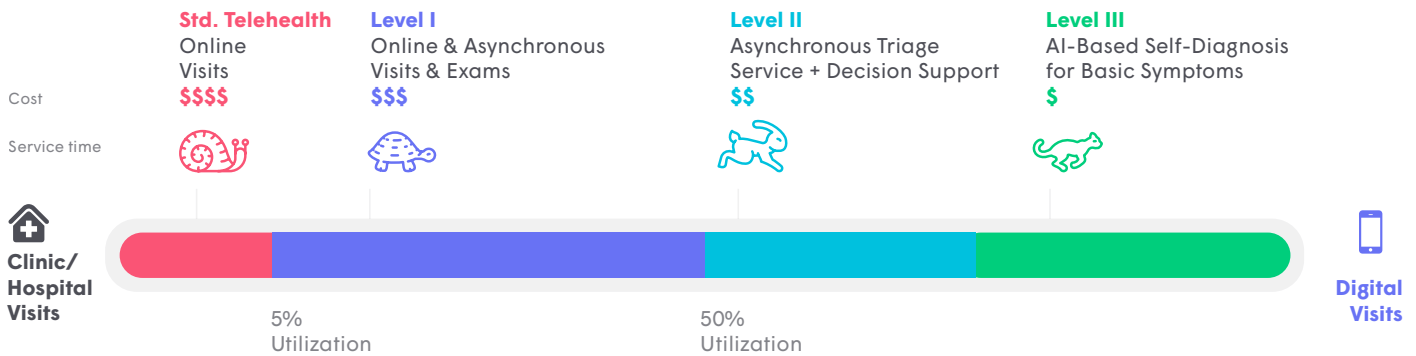

## Our Solution

We seamlessly connect people to clinicians to provide the best remote examination and diagnosis solutions. TytoCare's solutions are designed to replicate a face-to-face clinician visit and include a smart mobile examination tool for examining the heart, lungs, stomach, skin, throat, ears and body temperature, and a complete telehealth platform for sharing exam data and conducting live video exams.

**Safe and Comprehensive medical exam** - Hand-held modular medical kit enabling a comprehensive and easy to use remote exam with a clinician. Supporting all necessary telehealth workflows, including scheduling and administration. Full compliance and regulatory clearances including FDA, CE, Health Canada, ISO medical, HIPAA, HITRUST, GDPR, etc.

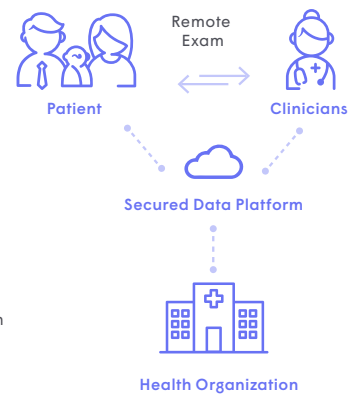

## Shift primary care from physical interactions to a truly digital service

## A Full-Stack Telehealth Platform

Now clinicians can reliably diagnose an ear infection, sore throat, or upper respiratory infection when their patients are miles away. TytoCare is a complete telehealth solution that enables a comprehensive telehealth visit with a physical exam, anytime and anywhere.

## About us

TytoCare was founded by Dedi Gilad, Ofer Tzadik and industry experts in 2012 and has received over \$105 million in funding from leading / strategic investors including Insight Partners, Olive Tree Ventures, and Qualcomm Ventures, with participation from Orbimed, Echo Health, Qure, Teuza, Cambia Health Solutions (BCBS plans), Ping An, Walgreens, Itochu and more. Following FDA clearance and the launch of its products in the United States in Q2 2017, TytoCare has gained significant traction with over 54 major health systems and HMOs, leading telehealth companies, payers, large private practices and employers. TytoCare is currently seeing high demand and commercial growth, both in the US and in global markets.
