OUR SERVICES

Big Data and Innovation

Leading the way in cutting edge medical research and technology

Offering researchers and entrepreneurs unparalleled access to comprehensive medical data

Rich digital longitudinal data that spans over 30 years with over 4 million medical records, containing numerous data types from various medical sources

A unique online research platform in an on-premise or a multi-cloud based environment relying on leading big data, machine-learning and AI technologies

Maccabitech - Epidemiological Research

Over 15 top talent research scientists

Leading studies in epidemiology, data science, and healthcare services research

Hundreds of professional publications in well-known scientific medical and academic sources

Clinical research

Specializing in providing high quality expedited clinical trials. The research team's ability to optimize participant recruitment allows us to provide a "one-stop shop" for research from the planning phase to execution.

Biobank

The Tipa Biobank™ is the only large-scale biobank in Israel and is based on a nation-wide population cohort, which impressively consists of over 500,000 biologic samples

SUCCESS STORIES

k health
An online medical chat support enabling personalized accurate health information within our members network.

IBEX
AI-based prostate & breast cancer diagnosis. Clinical grace algorithms identifying cancer as accurately as a human pathologist.

Medial EarlySign
Allowing personalized predictive detection of colorectal cancer.

IBM
Image analysis technologies and deep learning techniques "teaching" computers how to identify breast cancer findings in mammography images.
