

X-trodes

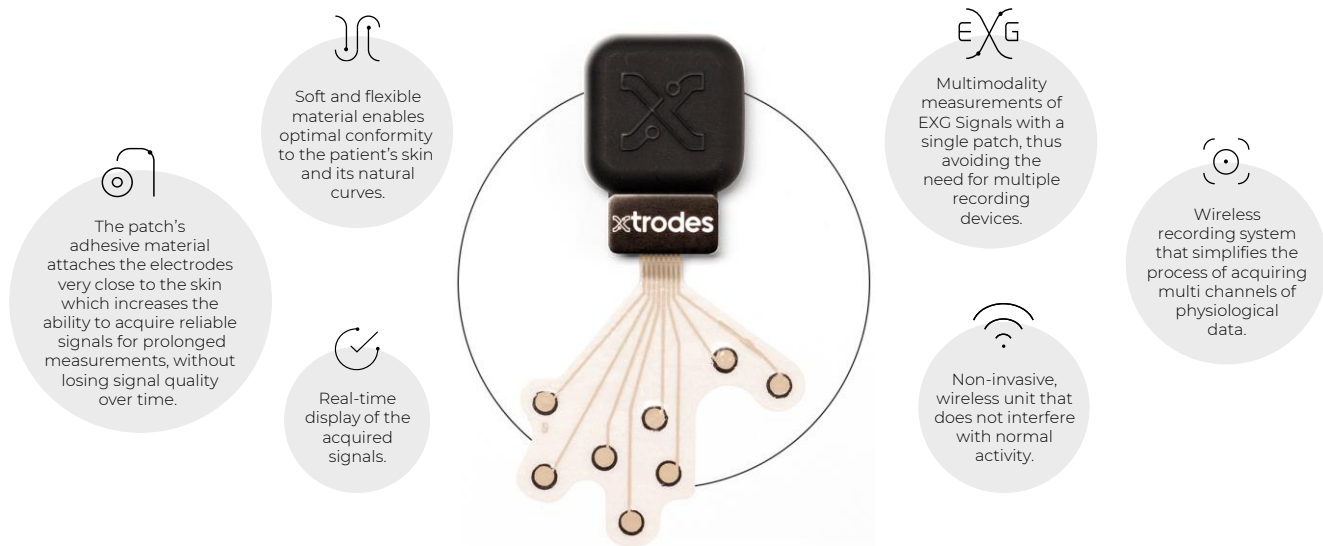

Sensing. The Future.

Presenting a Medical-Grade Home Monitoring Platform

MAKING NEUROBIOLOGY ACCESSIBLE FOR EVERYONE, EVERYWHERE

Backed by years of academic research and scientifically validated patents, X-trodes has developed the world's first wireless Smart Skin that consists of an ultra-soft, dry, multi-electrode patch array system. Its patented technology is powered by signal processing and machine learning methodologies, which provide objective monitoring, optimized for everyday activity in any environment.

The bio-convergence company's mission is to lead a revolution in bringing the electrophysiology world from clinics into our daily environment, in order to improve quality of life by perfecting wearable technology for advanced electrophysiological measurement and analytics.

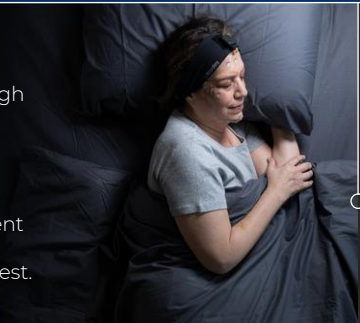

OUR SOLUTIONS

SLEEP ANALYSIS

Restoring quality of life through accurate sleep analysis and advanced AI-driven insights.

Understand sleep patterns, diagnose sleep disorders and optimize medication treatment with X-trodes' smart wireless medical grade home-based test.

REMOTE REHABILITATION

Improving fitness & performance with sports science: anytime, anywhere.

Easily monitor athletic electrophysiology function in dynamic environments and analyze every muscle with wireless AI-driven insights by X-trodes.
