

# COMPREHENSIVE CLOUD-BASED SECURITY

Reblaze Technologies offers an all-in-one web security platform. It includes a next-gen WAF, full-scope autoscaling DDoS protection, advanced bot management, real-time traffic monitoring & control, and more. Reblaze is fully integrated with the top-tier public cloud providers (AWS, Azure, and GCP), and runs on the customer's clouds of choice.

The platform is designed around a no-compromise approach to web security. All customers enjoy comprehensive protection, without having to purchase premium tiers or subscribe to additional services. Each customer receives a dedicated Virtual Private Cloud, eliminating multi-tenancy vulnerabilities. For maximum privacy, all traffic data is processed exclusively inside the customers' clouds (many competing solutions decrypt customer data on their own servers). Multivariate threat detection, behavioral analysis, and machine learning ensure accurate, adaptive protection.

# ABOUT REBLAZE

Reblaze is a cloud-based, fully managed protective shield for sites and web applications. The platform is a comprehensive web security solution, providing a next-gen WAF, DoS and DDoS protection, bot management, scraping prevention, CDN, load balancing, and more.

Reblaze offers a unique combination of benefits. Machine learning provides accurate, adaptive threat detection. Dedicated Virtual Private Clouds ensure maximum privacy. Top-tier infrastructure assures maximum performance. Fine-grained ACLs enable precise traffic regulation. An intuitive management console provides real-time traffic control. Full integration with top-tier cloud platforms provides a turn-key web security solution.

## NEXT-GENERATION WAF/IPS

Reblaze defeats breach attempts, code and SQL injection, cross-site scripting, form manipulation, protocol exploits, session poisoning, malicious payloads, and other forms of attack.

## DOS/DDOS PROTECTION

Reblaze is effective against DoS across layers and at all scales: from single malformed-packet DoS attempts to massive DDoS botnet assaults.

## BOT MANAGEMENT

Reblaze prevents data theft & scraping, credential stuffing, brute force attacks, application abuse, vulnerability scanners, inventory denial, and more.

## ATO PREVENTION

Reblaze prevents ATO (Account Takeover) attacks, and keeps user & customer accounts secure.

## API SECURITY

Reblaze provides full protection for web services, microservices, mobile/native APIs, and more.

## REAL TIME TRAFFIC CONTROL

Reblaze provides full real-time traffic analytics and statistics, even during large-scale attacks.

## FULLY MANAGED SAAS

The platform is maintained remotely by Reblaze personnel. Your web security is always up-to-date.

## MACHINE INTELLIGENCE

Reblaze uses Machine Learning to recognize new threats as they arise, and hardens itself against them.

## DEPLOYS ANYWHERE

Run Reblaze as SaaS, or in your own cloud, container, hybrid/multi-environment, or service mesh.

Reblaze's clouds are fully compliant with GDPR, SOC 1/ SSAE 16/ ISAE 3402, FISMA Moderate, ISO 27001, FIPS 140-2, HIPAA, and CSA. Reblaze Technologies is a PCI DSS Certified Level 1 Service Provider.
