

CUTTING EDGE TECHNOLOGY THAT TRACKS, PREDICTS AND ANALYZES YOUR GOODS IN TRANSIT, GIVING YOU VISIBILITY AND CONTROL FROM ORIGIN TO DESTINATION

Contguard is a global company that offers end-to-end service for managing goods in transit by providing shipment data, business intelligence services, and actionable insights.

Our leading edge technology and professional services deliver data insights your company needs in order to effectively manage your supply chain online and make proactive decisions.

This results in maximizing efficiency, optimizing resources, mitigating risk, reduction in cargo loss and better fulfilment.

TRANSFORM AND DIGITIZE YOUR ENTIRE SUPPLY CHAIN

Founded by a team of logistics engineers, supply chain experts and big-data specialists, Contguard provides end-to-end visibility of cargo in-transit, supporting shipments to any destination globally.

Our revolutionary **IoT and AI-based technology** supports leading global industrial organizations in transforming their supply chain to a digital infrastructure.

70% of the world's goods are in transit at all times with almost no visibility & control

NO MORE BLIND SPOTS IN THE SUPPLY CHAIN

Elevated level of transparency and control of your goods in transit will help you make better data- based decisions, **optimize your logistics, select the safest, fastest shipping routes, avoid unnecessary risks, and help ensure full regulatory compliance.**

 Secure your cargo in transit

 Reduce logistics costs

 Improve supply chain performance

 Improve risk management conditions

 Improve customer service

 Strengthen brand reputation

IOT AND AI-BASED SOLUTIONS PROVIDE REAL TIME ACTIONABLE INSIGHTS

Contguard's **lightweight, highly secure, IoT device** is attached to your cargo (e.g. containers, trailers, loose cargo), triggering critical reports - such as location, temperature, humidity, impact, and security data, in real time.

Our **AI-based, cloud-based technology** processes this data, together with third-party data, into real-time alerts, insights, and predictions on our web and mobile platform, specifically tailored to your business needs.

IoT units are attached and collected by Contguard's Global Affiliate Network - over 32 affiliates worldwide who provide local customer support.

AROUND-THE-CLOCK OPERATIONS PROVIDE EXTRA SECURITY AND PEACE OF MIND

Contguard's 24/7 Operational Control Center provides an additional layer of security for your cargo, proactively communicating possible issues (such as container breaches, major temperature changes or deviation from planned routes).

Contguard's professional services team also offers incident management and reporting to support your compliance and regulatory needs.

VERTICALS WE COVER

Contguard helps monitor and track billions of dollars worth of cargo in thousands of shipments, across a multitude of global routes.

Our clients include leading brands from various industries, such as pharma, automotive, defense, food, agriculture, electronics, logistics, and more.

We are proud to partner with leading insurance and banking companies throughout the world, to increase risk mitigation and product financing strategies.

NO UPFRONT INVESTMENT TO GET YOU UP AND RUNNING

Helping companies realize the full scope of benefits from our leading-edge technology, Contguard offers a 3-month pilot program.

The program includes our full suite of monitoring and evaluation services, for your selected 50 shipments and routes.
