

THE PRACTICAL WAY TO REDUCE HIGH-RISK TRAFFIC AND PARKING VIOLATIONS

Safer Place has developed a practical, cost effective video-based technology platform to reduce traffic violations, increase road safety and improve traffic flow. Our solution detects the widest range of moving and parking violations and includes a complete suite of applications in support of the entire enforcement process. We deliver a reliable, field proven technology backed by expert professional services for fixed, mobile, portable and handheld deployment.

TRAFFIC

Safer Place technology reduces reckless and dangerous driving, and increases road safety for drivers and pedestrians. It detects all types of moving high-risk traffic violations on a single unified platform, and supports dozens of traffic and reckless driving violations on the high ways and in the cities including:

PARKING

Safer Place technology improves enforcement of all types of urban parking violations supporting smart cities initiatives. Our unique 'presence' feature enables municipal authorities to detect the presence of a driver in or nearby a car during a parking violation. Our video based solutions detect the widest range of violations including:

FEATURE HIGHLIGHTS

Safer Place delivers a complete suite of applications with seamless interfaces to existing and legacy back-office system applications:

Field proven Technology:

Our solutions are reliable, robust and already operational generating millions of tickets.

Accurate Ticket Production:

Safer Place generates digital tickets to minimize manual tasks and reduce the probability of human error.

Privacy Protection:

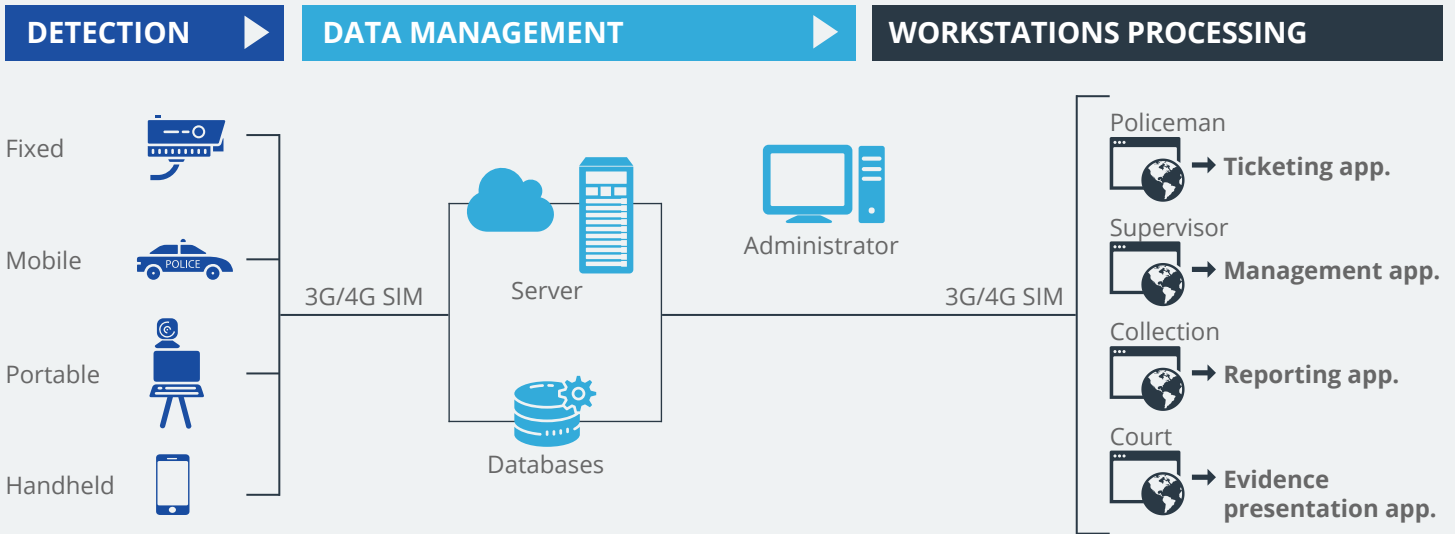

Safer Place produces blurred videos and images to protect the privacy of citizens and comply with local privacy regulations.

Fast Report Generation:

Safer Place delivers a complete set of ready-to-use and customized reports and statistics.

UNIFIED TECHNOLOGY PLATFORM

Safer Place delivers a complete unified platform that supports all types of cameras and includes a single database with a full suite of built-in ticketing, reporting, and evidence presentation applications.

CUSTOMER BENEFITS

Safer Place helps police, municipalities and law enforcement agencies to detect non-conventional, high-risk traffic violations. The improvement of traffic enforcement increases road safety, reduces dangerous driving and prevents serious or fatal injury to pedestrians. Safer Place delivers an accurate, efficient, effective, and affordable solution to improve the enforcement of parking violations.

-  **IMPROVE ROAD SAFETY**
Increase enforcement of moving traffic violations that cause traffic accidents
-  **INCREASE PRODUCTIVITY**
Generate 10 times more tickets per officer per shift with higher accuracy
-  **REDUCE LEGAL APPEALS**
Produce legally compliant video and photo based evidence
-  **SINGLE, UNIFIED PLATFORM**
Handle multiple types of violations with seamless integration to legacy back-office applications
-  **FLEXIBLE DEPLOYMENT**
Deploy any type of solution including fixed, mobile, portable and handheld configurations
-  **MINIMIZE INVESTMENT**
Deploy a cost-effective pay-as-you-go solution with no upfront investment costs for the customer
