# ObliMapper

Actionable Intelligence
at the Push of a Button

Image-capturing, image-handling, and image-analysis tool

With its 360-degree view of an area, ObliMapper transforms images into accurate, meaningful, and actionable visual intelligence

Off-the-shelf drones	High data security	Works offline

FLIGHT PLANNING AND IMAGE CAPTURING

- Automatically creates a flight plan for the area of interest
- Flies autonomously and captures images by using a drone's standard camera
- Automatically processes the images

2D ANALYZING

- Creates a digital surface model
- Views up-to-date oblique images from all directions
- Accurately measures oblique images
- Analyzes terrains, contour lines, slopes, visibility, and geographic information systems data

3D ANALYZING

- Creates a 3D model
- Integrates a 3D viewer
- Measures distance, performs line-of-sight analysis, and annotates objects

Combat proven for the past 20 years
