

The Only Critical Infrastructure-Native Cyber Defense Company

Suite of cutting-edge training solutions, defense products and value-added services - based on knowhow and technology proven effective in defending and securing the infrastructure of one of the most-targeted companies, Israel Electric Corporation (IEC).

Enabling the critical infrastructure sector to prepare its **people, products,** and **processes** for the next attack.

Industries We Serve

Energy

Financial Services

Healthcare

Transportation

Government

End-to-End Cyber Defense

Anything you have coming, we've already experienced.

Defend Your Assets

Implement the best defense suite, to protect your entire organization from relevant cyber challenges.

Know Your Attacker

Leverage our unparalleled understanding of cyber security as you learn to tackle the latest cyberattacks.

Comply With Regulations

Meet future regulatory requirements with solutions advanced to suit the changing cyber landscape.

Covering all levels of technical skill, our training is available for people throughout your organization:

Cybersecurity professionals
(IR Team, SOC Team)

IT/OT professionals

Executives

General employees

Cyber Training Arena

Optimize and advance the skills and expertise of your critical line of defense, turning your employees into cyber defenders.

Leveraging our vast experience in the critical infrastructure sector, CybergymIEC emulates your network environment, security and technology configuration, and the exact threat model that you face.

Some of our vast training programs include Cybersecurity Awareness, Cyber Crisis Management for Executives, Essential Incident Response Tactics, Advanced Digital Forensics, Advanced SOC-Intrusion Detection, and more.

Delivered through a combination of classroom-taught theory, lab training and emulations of real-world attacks (APTs), the hands-on CybergymIEC methodology has been proven to be the most effective way of building the skills of technical and cyber security personnel in the critical infrastructure sector.

Defense Solutions

Enhance security and resilience with a toolkit developed specifically for the critical infrastructure environment.

Developed with the sole purpose of protecting a leading critical infrastructure company, our cyber defense and resilience solutions are based on vast, real-life day-to-day experience, gained in a challenging geopolitical environment.

 **Sophic Pro** - Benefit from expert consulting services and workshops

 **Sophic OT** - Implement advanced secure solutions for SCADA/ICS systems

 **Sophic Picture** - Gain a clear, detailed, accurate and updated picture of your own organization's cyber picture, including strengths & weaknesses analysis

 **Sophic Zone** - Emulate, simulate and validate operational systems, technology and processes, in a near-real-time environment

Value-Added Services

Test, analyze and evaluate your organization's cyber strategies and technologies, to identify and close any gaps that attackers could exploit.

As both a heavily-targeted organization and a cyber defense company, we apply our own knowledge and best practices to help you validate and build your in-house cyber defense capabilities.

Our value-added services include:

Crisis management and Incident Response Services

Vulnerability Assessment

Rapid Cyber Maturity Assessment (RCMA)

SOC-as-a-Service

Secure Code Review

Penetration Test
