

STATE LEVEL SECURITY FOR THE COMMERCIAL WORLD

SECURING YOUR DATA DURING THE CYBER-PANDEMIC REQUIRES SOME SERIOUS RETHINKING.

KAZUAR DID JUST THAT.

KAZUAR offensive and defensive cyber specialists daringly redesigned IT architecture to enable secure remote access to your organization's most critical data.

KAZUAR provides your organization with state level security with commercially convenient user experience.

The KAZUAR purpose-built laptop creates hardware isolated workspaces and enables access to the open (blue) workspace and secure (black) workspace. A simple click of a button switches between the workspaces.

KAZUAR FEATURES

- End to end solution providing hardware isolated workspaces
- Multiple secure workspaces in a single laptop with separate OS, CPU, GPU, storage
- Secure Import / Secure Export
- Secure key storage
- 2FA using built-in HW authentication
- Cyber security protection warranty

KAZUAR OFFERS 2 SOLUTIONS

Kazway is a powerfully secure and cryptographically separated access gateway to your business data center providing trusted and confidential communication under compromised conditions.

Fortress adds complete protection and governance of the organization data with secure import and export of sensitive data.

KAZUAR BENEFITS

SECURITY

- State level security solution
- Stronger security than combination of existing products
- Reduction of strategic cyber risk and 3rd party cyber liability
- Protection from future attacks

SIMPLICITY

- Single solution vendor
- The simplest UI possible – click of a button
- No security related frustration
- Simplify cyber admin processes and save operational cost

MOBILITY

- Work securely from anywhere
- No leak of data if laptop is lost or stolen
- Laptop is secure against side channel attacks
- Encrypted audio and video conferencing
