

## PORTABLE CANNABIS ANALYZER

### GemmaCert's introduction to Law Enforcement

The GemmaCert went to market in 2020, during this time we took the time to really perfect our technology, to make sure that our accuracy, customer support, and professionalism meets the highest standard. After working closely with our Cultivation, Pharmaceutical, and regulation agency customers we are now confident that we can start working with law enforcement agencies after consulting with them and getting their proof of quality. The GemmaCert will be valued by all law enforcement agencies, federal and state for in-field testing. All that is needed to run tests is an android or ios device with an internet connection(wifi or mobile data). All tests are saved in cloud storage for viewing at a later stage.

### Why choose GemmaCert over other analyzers?
