Ensure real-time visibility, boost operational efficiency, and improve financial outcome

By IntraPosition's RTLS

Gain a new layer of visibility into what is happening in your hospital. Seamlessly track and manage medical assets in real time with IntraPosition's Asset Tracking solution. IntraPosition's end-to-end solution allows easy-to-use software and hardware to manage and monitor assets, including real-time reports, insights, map view, and geofencing alerts. With IntraPosition's robust solution, you can drive meaningful improvements and savings to your organization.

THE NEED FOR ASSET MANAGEMENT SYSTEM

Equip your staff with a reliable real-time asset management system to achieve an operationally efficient healthcare environment.

Save caregivers valuable time searching for medical assets and eliminate asset hoarding with a highly accurate asset management system. From room-level separation and up to 1 ft. accuracy, healthcare facilities can use the asset tracking solution to automate workflows such as PAR-level reports and geofencing alerts.

BENEFITS

Save valuable caregivers' time. Don't search, fetch.

Optimal asset utilization and eliminate unnecessary P.Os

Improve patient experience with immediate care

Boost personnel satisfaction with easy to use tools and services

Ensure real-time visibility, boost operational efficiency, and improve financial outcome

By IntraPosition's RTLS

KEY FEATURES

Geofencing alerts. Seamlessly create and define geofencing alerts. Use PAR-level reports to ensure the medical assets are in place.

Map view. Use a real-time map to locate and track your medical assets at all times.

User Management. Open as many users as you need and assign different roles and permissions to each.

History player. Monitor the path and movement of each medical device with our easy-to-use history player.

Create and pair new assets. Instantly create and pair new assets from any mobile device, tablet, or desktop.

Remote monitoring. No additional hassle for your IT team.

The system is monitored remotely at all times.

DEPLOYMENT

IntraPosition patent-pending deployment solution allows using sparse infrastructure without compromising on performance. Use infrastructure only along the corridors to achieve room-level separation.

ONE TECH FITS ALL

IntraPosition's technology can address various location-based applications. With one deployment effort, hospitals can add more and more location-based applications over time.

ACCURACY

IntraPosition's UWB technology with its unique differential accuracy approach enables getting the desired accuracy where needed, with minimal hassle. Anywhere from room-level to bed-level and 1-ft accuracy.

ATTRACTIVNESS

Best-in-class real-time location system at a fraction of the cost compared to legacy solutions.
