

The Problem

- 785 million people lack even a basic drinking-water service, including 144 million people who are dependent on surface water.
- Globally, at least 2 billion people use a drinking water source contaminated with feces. Contaminated water can transmit diseases such as diarrheal, cholera, dysentery, typhoid, and polio. Contaminated drinking water is estimated to cause 485 000 diarrheal deaths each year.
- By 2025, half of the world’s population will be living in water-stressed areas.
- In least developed countries, 22% of health care facilities have no water service, 21% no sanitation service, and 22% no waste management service.

Options for water sources used for drinking water and irrigation will continue to evolve, with an increasing reliance on groundwater and alternative sources, including wastewater. Climate change will lead to greater fluctuations in harvested rainwater. Management of all water resources will need to be improved to ensure provision and quality.

The Team

EZPack Water Ltd. (EZPack) was co-founded by **Alex Harel** and **Shalom Green**. Alex Harel is EZPack’s CEO, and in the past 20 years has founded and managed several start-up companies in Israel and the US. Shalom Green is EZPack’s VP Business Development & marketing and has vast experience in international business development.

EZPack’s Solutions

EZPack’s products are in 3 main categories:

1. Water purification & desalination – the EZPuro™ - Compact-Robotic Water Purification/Desalination System fit for drinking, agriculture and industrial applications.
2. Atmospheric Water Generator – the EZCond™ - based on our proprietary-innovative off-grid energy storage concept, combined with proprietary control algorithm.
3. Water storage, transportation & distribution built on our proprietary 2-layers bladder technology. This line includes unique water transportation solutions.

Our main market segments are Agriculture, disaster relief & emergency, water supply to remote areas, outdoor.

Market Positioning

We are focusing on market segments that we have competitive advantage:

- ✓ Drinking and agriculture water supply to remote areas based on purification, desalination and condensation.
- ✓ Local water purification/desalination applications (industrial and commercial).
- ✓ Large volume water supply to wildfires firefighting.
- ✓ Disaster relief and emergency support.

Current Status

- We are the leading supplier of emergency water system in Israel.
- We are looking for marketing partners, strategic partners, and investors.

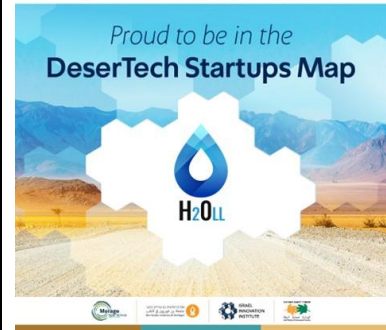

Company Profile

Israeli private company
 Industry: Water, Agriculture
 Address: Kibbutz Shomrat, Israel
 Products: EZPack® 2-layers bladders; JerryFlex™, FlexCon™, HipoKit™, EZPuro™, EZCond™, EZPower™, Thermoflex™, Spider™, Lagoon™

Management:

Alex Harel, CEO
 Shalom Green, VP Business Development
 Ohad Zecharia – Director of Operations
