

Level Up! It's Time to Digitize Your World

IntraPosition's innovative technology brings high-accuracy, indoor positioning into the retail, healthcare and industry markets, enabling indoor-navigation, asset-tracking and workforce management.

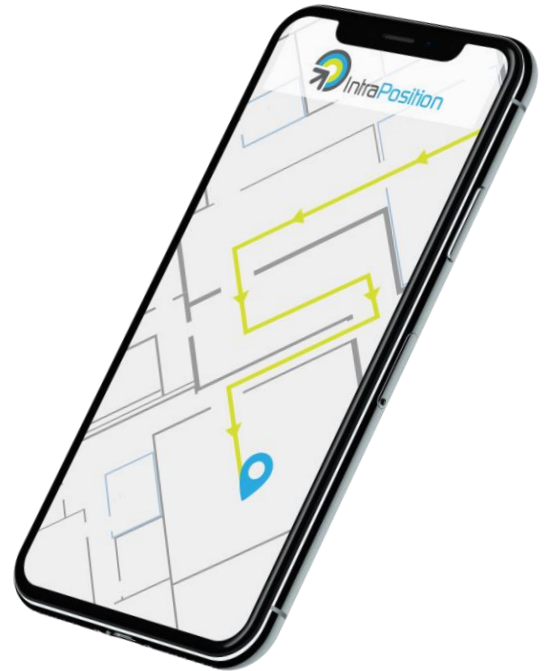

With a unique fusion of indoor positioning and IoT technologies, we digitize the physical world.

Utilizing real-time, 1-ft accuracy indoor positioning, we pinpoint the location of every object or person of interest. With a combination of high performance and affordable pricing, we hit the sweet spot of numerous applications and markets.

Our systems are highly scalable and easy to deploy with quick & simple installation.

IntraPosition's real-time unique system provides the ultimate indoor positioning and indoor navigation experience with top-of-the-line performances.

Our solutions easily integrate with any external application of choice, via a RESTful API.

We offer optimization for industries actively seeking to reduce costs and improve efficiency and safety

Retail

- Step-by-step in-store navigation
- Shopper analytics
- Store operations optimization

Healthcare

- Real-time monitoring of patients and staff
- Locate medical devices
- Identify emergency situations automatically

Industry

- Control access to unauthorized areas
- Workforce management
- Locate equipment and machinery
