VIVI CAP1™ is manufactured and distributed by TempraMed Inc. FDA registration number 3012381649 19481 SE 14th St. Sammamish, WA 98075, USA, info@TempraMed.com, www.tempramed.com

<sup>1</sup> VIVI CAP1 keeps insulin cool within safe temperatures below 29°C (84.2°F) for minimum of 12 hours even in a constant environmental temperature of 37.8°C (100°F), when the device is

<sup>&</sup>lt;sup>2</sup> VIVI CAP1 is 'reactivated'/'filled up' to provide safe storage conditions, without any special user intervention, whenever the ambient temperature gets below 27°C (80.6°F), for subsequent periods of 12 hours and for up to 365 days of daily use, under limited warranty.

Reactivation time varies and depends on the use conditions and ambient temperature. If needed VIVI CAP1 can be placed in the refrigerator without the insulin pen, to accelerate reactivation.

### **Other VIVI Cooling Products**

#### VIVI VIAL - keeping it cool!

- Cooling<sup>1</sup> to recommended temperature
- Just put your vial in, and it works
- No need for refrigeration to activate
- Temperature assurance indicator
- Small and lightweight
- Good for daily use
- One year<sup>2</sup> limited warranty

VIVI VIAL physical dimensions: Weight < 2.0 OZ (60 gr), Length 2.6" (70mm), Diameter ≤ 1.3" (35mm)

### **VIVI COOL 8c VIVI VIAL 8c**

#### - up to 24h & 8°C cool

- Stays cool at 8°C (<47°F) for 24 hours
- Temperature assurance indicator
- Lightweight
- Simple & easy
- Just place it in the refrigerator or freezer to reactivate between use
- Good for daily use
- One year<sup>2</sup> limited warranty

#### **VIVI COOL 8c physical dimensions:**

Weight < 3.5 OZ (100 gr), Length 5.7" (147mm), Diameter ≤1.3" (35mm)

#### **VIVI VIAL 8c physical dimensions:**

Weight < 3.5 OZ (100 gr), Length 4.7" (120mm), Diameter ≤1.3" (35mm)

### VIVI EPI - always cool!

- Cooling<sup>1</sup> to recommended temperature
- Just place your EpiPen® in, and it works
- No need for refrigeration to activate
- Temperature assurance indicator
- Lightweight
- Confidence for one year<sup>2</sup>

VIVI EPI physical dimensions: Weight < 2.8 OZ (80 gr), Length 5.7" (155mm), Diameter ≤1.3" (35mm)

1 VIVI VIAL & VIVI EPI keep vial and EpiPen® cool within safe temperatures below 29°C (84.2°F) for minimum of 12 hours even in a constant environmental temperature of 37.8°C. (100°F), when the device is placed inside a personal handbag.

<sup>2</sup> VIVI VIAL & VIVI EPI are 'reactivated'/'filled up' to provide safe storage conditions, without any special user intervention, whenever the ambient temperature gets below 27°C (80.6°F), for subsequent periods of 12 hours and for up to 365 days of daily use, under limited warranty.

Final products dimensions and performance may slightly vary. For exact products specifications refer to the relevant user guide. VIVI logo VIVI CAP, VIVI EPI, VIVI VIAL names are trademarks of TempraMed. EpiPen is registered trademark of Mylan Inc.
