

Assistive Hearing
Solutions

BeHear

by Alango Technologies

PRODUCT PORTFOLIO

OUR COMPANY

When hearing fades, isolation grows. Hearing connects us to the rhythm of life, the voices of loved ones, the soaring beauty of music, nature and so much more. At some point we will all experience hearing degradation or know someone who is suffering from hearing loss - that's why we leveraged Alango's sound technologies to create the BeHear product line.

Our hearing solutions package more than two decades of expertise in a way that is simple, easy to use and accessible for all. As engineers, we are privileged to apply our knowledge to connect people back to the heartbeat of experiences and literally, make life sound better.
