

# Your plans for genetic healthcare options just got **bigger**. And **better**.

## SYSTEM FEATURES

- Rapid raw input analysis
- Automated NGS handling
- Couple patient results
- Annotate discoveries
- Handle no-calls
- Cloud & hybrid deployment
- Track patient status
- Proprietary genetic algorithms
- Calculate residual risk
- Automated triage of patients
- White label & customizable

## PATIENT BENEFITS

- Digital Genetic Assistant™
- User-friendly interfaces
- Remote enrollment
- Educated digital consenting
- Engaging dynamic reporting
- On-demand access to genetics
- Multilingual and accessible
- Real-time notifications
- Dynamic educational multimedia

Creating accessible  
& actionable genetic  
data for all

Igenify is a unified, end-to-end, genetic platform that places a Digital Genetic Assistant in the palms of individuals around the world. Our solution overcomes the bottleneck imposed by the severe shortage of genetic counselors.

Igenify is the evolution of genomic technology that delivers a patient-focused experience and empowers healthcare providers to service them.

### ENROLL. EDUCATE. CONSENT.

Powered by Igenify Access™

Digitally enroll patients with a user-friendly application optimized for any device while utilizing a provider dashboard to view, manage, and track patient enrollment and data.

### YOUR PERSONAL GENETIC ANALYST

Powered by Igenify Analyze™

Igenify's Digital Genetic Assistant acts as your personal genetic interpreter. Upload or build your panel and process batches of genomic data in minutes. Identify patients at-risk faster.

### CREATE ACTIONABLE GENOMIC DATA

Powered by Igenify Insight™

Translate sequenced genomes, generate reports and create actionable data. Igenify Insight will give clinical recommendations and makes it easy to assess residual risk – charged by genecist approved workflows.

### NEXT-GEN PATIENT COUNSELING

Powered by Igenify Counsel™

Your Digital Genetic Assistant is built to educate at the highest level of retention. It uses modern multimedia to counsel low-risk patients. Create reports your team needs in seconds so you can focus on at-risk patients.
