BA-1200

The BA-1200 is the industrial line's compact device. A programmable, automated device that utilizes sensors-based algorithm to ensure an optimal distribution of Enviro-Biotics® via HVACs.

Our patented design provides an in-depth microbial bio-cleansing highly contaminated HVAC ducts, transforming HVACs from being the main contributor of Building Related Illness (BRI) to an effective method of spreading Enviro-Biotics® that purifies entire facilities.

The BA-1200 is built with a robust metal chassis. The installation is easy and quick, providing ideal coverage to small-medium size facilities. The BA-1200 cover an area of up to 1250 sqm. (12,500 sqf.), using a 500 ml (17 oz) bottle of Enviro-Biotics®

Dimensions: L18 x H 39 x W 13 cm (7 X 15 X 5 Inch)

BA-1800

Robustly built in a metal enclosed chassis for deployment in machine rooms, the BA-1800 is the industrial line's largest device.

The BA-1800 is an automated, programmable device that utilizes sensors-based algorithm to ensure an optimal distribution of Enviro-Biotics® via HVACs.

Our patented design provides an in-depth microbial bio-cleansing highly contaminated HVAC ducts, transforming HVACs from being the main contributor of Building Related Illness (BRI) to an effective method of spreading Enviro-Biotics® that purifies entire facilities.

The BA-1800 installation is easy and quick, providing ideal coverage for large facilities. The BA-1800 should cover an area of up to up to 2,500 sqm (25,000 sqf).

Dimensions: L 22 x H 49 x W 19 cm (9 x 19 x 75 Inch)
