The logo consists of a stylized 'U' in orange and green, followed by the text 'Health Jackson' in a serif font.

Rehabilitation Care

Extraordinary

Like the work accomplished here

For decades, we have supported scientists and specialists working to advance rehabilitative medicine. That ongoing effort has led to this: a new, nine-story facility dedicated to helping patients get back their lives. Lynn Rehabilitation Center features cutting-edge technologies and world-class doctors, nurses, and therapists on every floor. It is the pinnacle of rehab care.

Strong

Like the will of our patients

This elite facility builds on the strengths of three world-class medical institutions: Jackson Health System, UHealth – University of Miami Health System, and The Miami Project to Cure Paralysis. Their research is our research. Their breakthroughs are our breakthroughs. And our 250,000-square-foot, 80-bed, fully-equipped, state-of-the-art rehab center is their world-class rehab center. Located right on the University of Miami/Jackson Memorial Medical Center campus.

Complete

Like the recoveries we strive for

Our goal is to provide the best in rehabilitative care to help patients achieve their best possible outcomes. To that end, we've filled this facility with all the latest tools and technologies—including an unprecedented seven ZeroG Gait and Balance Systems. We've also filled it with outstanding therapists from a variety of disciplines who work alongside leading physiatrists, physicians, and surgeons to create a personalized rehabilitation program for each patient. We've added a full complement of therapies to better help us meet our goal, including everything from inpatient to outpatient, physical to occupational, and speech to recreational therapies.

1 Inpatient gym

Our inpatient gym overlooks our outpatient gym, which overlooks the world outside. Because working in plain view of others and being able to see the next level of recovery are motivational.

2 Outpatient gym

This fully equipped gym features numerous ZeroG Gait and Balance Systems. ZeroG lets patients practice standing and walking, even climbing stairs, with high-tech support every step of the way.

Outpatient services include medical care, education, and emotional support, both for former inpatients and anyone else who might benefit from our expertise.

3 Pediatric gym

Another comprehensive gym, this time exclusively for children and adolescents. Here, a more kid-friendly tone welcomes and motivates young patients. Our specialized, multidisciplinary staff involves parents in the rehabilitation.

4 Aquatic center

Our aquatic center features the next-generation HydroWorx therapy pool, complete with an underwater treadmill. One end of this pool is also glass, top to bottom, to give therapists a better view and provide patients with the most accurate feedback.

5 Portal

A five-story column of spacious balconies, extending our multipurpose and dining areas. Panoramic views aid in the recovery process and inspire renewed confidence in getting back to life in the outside world.

6 Outdoor terrace

A beautiful outdoor garden on the third floor, ideal for short walks and fresh air. This expansive terrace overlooks the Outdoor Activity Center, providing additional motivation for patients.

7 Inpatient suites

With the latest built-in patient-care technologies, our inpatient suites were designed to feel like a home away from home, where our patients can enjoy TV, movies, and patient education content, on demand.

8 Outdoor activity center

Here, we offer half-court basketball, a putting green, a barbecue, and an interactive sculpture by world-renowned artist Olaf Breuning. His ingenious work features movable pieces to practice fine and gross motor skills. The cat sculpture, done in collaboration with Miami-Dade County Art in Public Places, is the centerpiece of the Outdoor Activity Center.

9 Transitional apartments

Our fully functional transitional apartments help prepare patients for their return to daily life. Each apartment features a bedroom, bathroom, kitchen with full-size appliances and dishwasher, dining table, and washer and dryer. This realistic home environment provides our patients and their caregivers with the opportunity to practice routine daily skills in a safe setting prior to going home.

10 Meditation space

The body and mind are inextricably linked, so we've also prioritized a place for meditation and relaxation to help ease the mind and, therefore, help heal the body.

11 Entrance/Main lobby

Drivers can drop off their passengers under a covered area or they can choose valet parking. The main lobby features expansive terrazzo flooring by world-renowned artist Jen Stark, also part of the Miami-Dade County Art in Public Places collection, along with a special tribute to Christine E. Lynn, the facility's founding benefactor.

12 Activities of daily living space

To practice airline travel, we provide actual airline seating. And to relearn automobile travel (i.e. entering, exiting, driving), we've installed a full-sized SUV, and a driving simulator.

Impressive

Like the people you'll find here

Lynn Rehabilitation Center was built from the ground up to offer the best in rehab care. It's evident in the architecture, interior design, and outdoor spaces. It's evident in the medical technology and amenities installed throughout. And it's evident in the impressive medical staff who use it all to help their patients.

Medical excellence for a global community

Jackson International connects patients from around the world with expert treatment for complex medical and surgical care. Jackson International provides a one-of-a-kind medical concierge and hospitality program. The program, which supports international patients and their families, assigns a hospitality coordinator who provides compassionate, professional, and personal assistance 24 hours a day.

Luxurious patient reception center

The VUMI International Patient Reception Center at Jackson Memorial Hospital is an upscale oasis for international patients and their families. The center features first-class hospital amenities in addition to luxurious waiting areas, examination rooms, and a full-service business center.

24-Hour access to expert medical care

Our hospitality coordinators are always available to assist with every aspect of inpatient and outpatient stays. Calling **+1 305-355-1212** connects the caller with foreign medical graduates trained to facilitate all aspects of emergency medical transfers.
