

# Strong.

Like the level of care.

**Christine E. Lynn Rehabilitation Center for The Miami Project to Cure Paralysis at UHealth Jackson Memorial** was designed from scratch to be one of the country's most elite facilities for patients recovering from traumatic brain injuries, spinal cord injuries, cancer treatment, and other complex conditions. We are dedicated to achieving the best possible outcomes for every patient, every day. Thanks to our decades of experience rehabilitating members of our community, we're able to offer a continuum of care with convenient "one-stop" inpatient and outpatient services, and use advanced diagnostic and treatment technology to accelerate recovery.

Rehabilitation Care

CHRISTINE E. LYNN REHABILITATION CENTER  
FOR THE MIAMI PROJECT TO CURE PARALYSIS

# Your future starts here

Your life can change in a split second, making even everyday activities challenging. At Lynn Rehabilitation Center, we tailor our treatment plans to meet your specific needs, ensuring you learn all the skills needed to navigate your daily life. Lynn Rehabilitation Center offers a full continuum of services for adult and pediatric patients. We specialize in treating a number of conditions, and offer specialty rehabilitation services and support.

- Nutritional therapy and dietary services
- Pathology services
- Pet therapy
- Pharmaceutical services
- Respiratory services
- Spiritual care

# Our commitment to you

Our services are delivered by specialists who have pledged to adhere to the mission, philosophy, and operating policies of our program, including:

- **Showing respect for the dignity of patients and their loved ones.**
- **Providing the highest-quality services.**
- **Demonstrating fairness, honesty, and maintaining ethical behavior in all interactions.**
- **Adhering to professional codes and practical guidelines.**
- **Providing an accurate portrayal of the services and outcomes of the program.**
- **Committing to ethical conduct in all communications and outreach efforts.**

## The road to recovery

Upon admission, each patient is evaluated by our team to establish performance, activities of daily living, functional mobility, memory and attention, social adjustment, and safety. Results of the evaluation, along with input from you and your family, are used to determine the appropriate plan and goals for discharge. Our team will then develop therapy based on your needs and will monitor program goals and progress throughout your stay. Our goal is to return you home and to restore you to your optimum level of independence.

## What you will need

To help make your stay more comfortable, bring loose-fitting clothing and personal items from home. A washer and dryer are available in the unit for patients and families.

### We recommend the following items:

- **Gym clothes**
- **Shirts**
- **Underwear**
- **Warm pajamas**
- **Robe**
- **Lightweight jacket or sweater**
- **Closed rubber-soled shoes**
- **Socks**
- **Feminine hygiene products**
- **Any aids such as dentures, glasses, hearing aids, and batteries**
- **Toiletries**
  - Toothbrush
  - Toothpaste
  - Comb
  - Shampoo and conditioner
  - Shaving essentials
  - Lotions
  - Bath soap

## Intensity

Each patient will receive a minimum of three hours of intense therapy, including physical, occupational, and/or speech, for five days a week or 15 hours a week (seven days) for an estimated total of 10 to 14 days.

## For your convenience

Our rooms are equipped with Wi-Fi, televisions, and clocks. At your discretion, you may bring other personal devices, but Lynn Rehabilitation Center does not assume liability if damage, loss, or theft occurs. We recommend you leave your valuables at home.

## Family support

Family and caregivers are an integral part of every recovery treatment plan. We provide comprehensive education, physical training, advocacy training, and supportive counseling to prepare the family for the patient's needs moving forward. We encourage family and caregiver participation throughout their loved one's stay.

## Neuropsychology and rehabilitation psychology

We provide inpatients and outpatients with a comprehensive array of neuropsychological, behavioral medicine, and rehabilitation psychology services by a team of specialized experts.

## Admissions and referrals

Our inpatient and outpatient settings provide ongoing medical care, education, and emotional support for patients, their families, and individuals throughout the community who need specialized rehabilitation services. The admission and referral process is simple. For admissions and referrals, call **305-585-9600**.

# Why choose us

## We get you home sooner

On average, Lynn Rehabilitation Center patients show more functional improvement than patients at other rehabilitation facilities, both locally and nationally. With a strong emphasis on quality outcomes, we provide excellent services to help patients achieve the highest level of independence possible.

## Unrivalled resources

Lynn Rehabilitation Center is part of an academic medical center, which provides a depth of resources unavailable to most rehabilitation programs. Physician members of the team are faculty of University of Miami Miller School of Medicine departments of physical medicine and rehabilitation, neurology, neurosurgery, pediatrics, and orthopedics.

## Team-based approach

Our team of physicians, speech pathologists, nurses, physical, occupational, and recreational therapists, rehabilitation navigators, psychologists, and support staff work together to ensure coordination of care throughout recovery.

## Accreditation

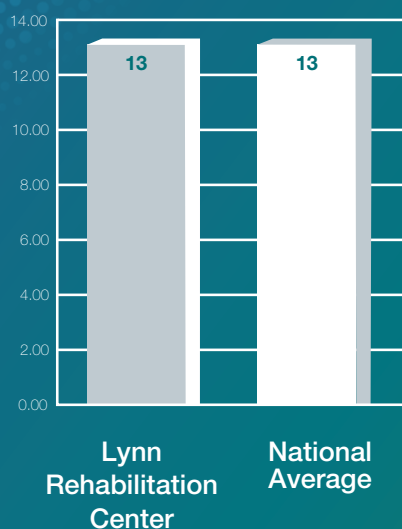

We are one of only two facilities in Florida accredited to train physical medicine and rehabilitation physicians. Lynn Rehabilitation Center has been awarded accreditation by the **Commission on Accreditation of Rehabilitation Facilities (CARF)**, **Joint Commission on Accreditation of Healthcare Organizations (JCAHO)**, and the **State of Florida Brain and Spinal Cord Injury Programs**. In addition, Lynn Rehabilitation Center was recognized in *U.S. News & World Report's 2024-2025* "Best Hospitals for Rehabilitation" list, ranking among the top 3 percent of rehabilitation centers nationwide.

## Our strength in numbers

Our team achieves the best possible outcome for patients. These models illustrate how our coordinated care leads to maximum outcomes:

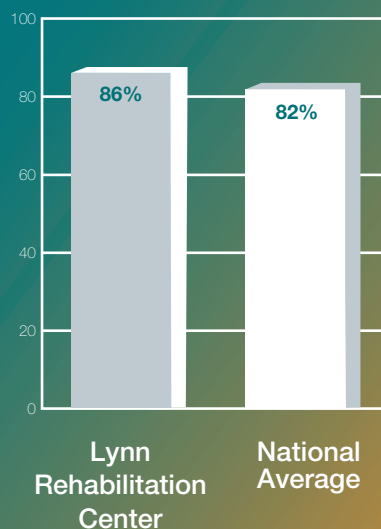

### LENGTH OF STAY (DAYS)

Reduced length of stay for patients in 2024.

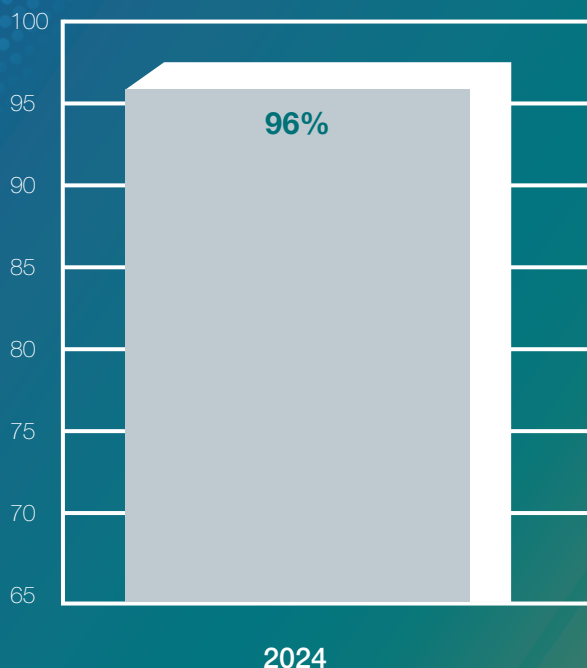

### DISCHARGE TO HOME

(Higher is better)

The percentage of total patients who were discharged home in 2024 instead of being discharged to another facility.

## OVERALL RATING

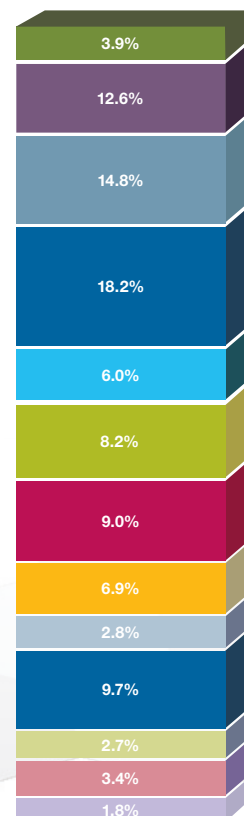

## Patient satisfaction

This score reflects how happy our patients are with their health care and the likelihood that they would recommend Lynn Rehabilitation Center.

## Patients served in 2024

### Rehabilitation Top Cases
