

POSTDOCTORAL RESIDENCY ADMISSIONS, SUPPORT, AND INITIAL PLACEMENT DATA

Postdoctoral Residency Program Admissions

Date Program Tables updated: November 23, 2020

Briefly describe in narrative form important information to assist potential applicants in assessing their likely fit with your program. This description must be consistent with the program's policies on resident selection and practicum and academic preparation requirements:

The **Clinical Child- Pediatric Behavioral Medicine Residency** training offers a 1-year postdoctoral training that combines inpatient consultation-liaison services to Holtz Children's Hospital, outpatient treatment through the Center for Behavioral Medicine (CBM), and applied clinical research under the leadership of Dr. Melisa Oliva and attending psychologists Dr. Natasha Pouloupoulos, and Dr. Jonathan L. Cohen. Residents will also have the opportunity to complete psychological testing batteries through the Child and Adolescent Center (CAC) and pediatric CBM outpatient clinics. As of April 2020, the Clinical Child- Pediatric Behavioral Medicine Residency training program is **accredited on contingency** by the Commission on Accreditation (CoA) of the American Psychological Association (APA). Questions related to the program's accredited status should be directed to: American Psychological Association; Office of Program Consultation and Accreditation; 750 First St., NE; Washington, DC 20002-4242; Telephone: (202) 336-5979 E-mail: apaaccred@apa.org; Web: www.apa.org/ed/accreditation.

Holtz Children's Hospital is one of the largest children's hospitals in the southeastern United States. Located at the University of Miami/Jackson Memorial Medical Center, it is known worldwide for the outstanding team of pediatric specialists experienced in treating children with all types of needs; from routine care to life-saving procedures. The Center for Behavioral Medicine and the Child and Adolescent Center are housed in the Jackson Behavioral Health Hospital, which specializes in behavioral health services to children, adolescents, and young adults, emphasizing advanced evidence based interventions with exposure to diverse cultural and ethnic populations.

Training in this Specialty Practice Area emphasizes the relationship among behavioral, emotional, cognitive, social, cultural and biological aspects of health and disease in order to promote well-being, prevent illness and aid in the rehabilitation process. The candidate selected for the Pediatric Behavioral Medicine residency will gain specialized clinical experience in pediatric psychology, including adjustment to new or chronic medical illness, preparation for medical procedures/surgery, end stage organ disease, conducting solid organ pre-transplant evaluations, burns, trauma, end of life issues, eating disorders, psychosomatic concerns, pain management, anxiety, depression, poor adherence to medical and psychiatric treatment, safety assessments, and multidisciplinary collaboration with medical teams.

Approximately 10% of the postdoctoral resident's time will be dedicated to applied research and academic pursuits related to the effectiveness of clinical treatment interventions and pediatric mental health issues within the medical setting. Opportunities for scholarly oral and/or poster presentations and involvement in scholarly publications will be available during the year. Evidence of a research product will be expected at the end of the residency.

This Specialty Practice Area consists of 4 emphasis areas, which run simultaneously:

- 1. Pediatric psychology consultation-liaison to inpatient medical units**
- 2. Outpatient therapy through the pediatric CBM clinic**
- 3. Outpatient psychological testing**
- 4. Pediatric Behavioral Medicine didactics**

The postdoctoral resident can also participate in seminars and special conferences that are offered in the medical center at the discretion of the postdoctoral resident's supervisor. The postdoctoral resident will work within a multidisciplinary team, including close collaboration between psychology and psychiatry staff and trainees. The postdoctoral resident will be provided the opportunity to teach multidisciplinary trainees in psychiatry, psychology and other disciplines as well as supervise pre-doctoral psychology interns. The postdoctoral resident will receive two hours of individual supervision and mentorship will be provided in teaching, supervision, research, and overall career and professional development.

Position not available for 2021-2022 residency year

Describe any other required minimum criteria used to screen applicants:

Eligibility: Applicants must meet the following prerequisites to be considered for our postdoctoral training program:

1. Completion of doctoral degree, including defense of dissertation, from a clinical or counseling psychology doctoral program accredited by the American Psychological Association (APA) before the start date of residency.
2. Completion of an APA-accredited or APPIC membership internship site.

Applicants who are selected will be required post-selection to:

1. Pass an on-site physical, drug screen and criminal background check within the 30 days prior to Residency start date.
2. Have an active Basic Life Support (BLS) card from the American Heart Association before starting their residency year.
3. Must be able to start on September 01, 2021.
