

Referral Checklist

Kidney, Pancreas, and Kidney-Pancreas Transplant

Thank you for choosing the Miami Transplant Institute for transplantation. In order to facilitate the patient's evaluation, please use this checklist as a guide to provide the following records. As you review the checklist, you will notice that some items are "Required" and others are marked "Preferred." The more patient information and records you can provide, the quicker the referral and evaluation can proceed. However, it's important to note that a patient's referral should not be delayed by waiting for these non-mandatory items, as we can address them at a later time.

Patient Name: _____

DOB: _____

Required

- Accompanying completed referral form
- Current medication list
- Copy of patient insurance card (front and back)
- Copy of a valid government issued identification (driver's license, passport, military ID)
