

51338

3/8" TORQUE WRENCH

TECHNICAL SPECIFICATIONS

Pieces	1
Square measure	3/8"
Material	Acero/Steel, Acero de carbono/Carbon steel
Number of teeth	45
Torque range	19-110Nm
Accuracy (clockwise)	±4%
Units of measure	Nm
Length	365mm
Weight	1,05Kg

SUMMARY

Lightweight and precise tool designed to apply the torque recommended by the manufacturer to bolts, preventing overtightening and deformation of parts. Its torque range is 19 to 110 Newton-meters (1.9 to 11 M.kg), with a 24-tooth adjustment mechanism that ensures optimal control. It has a total length of 365 mm, providing comfort and reach for precision work.
