

**Ref. 51717****Flexible Innerbraid Tube, Diameter 55 mm x Length 100 mm****Description**

It is used to connect the engine and the exhaust system and to transport exhaust gases

**Advantages**

- High pressure resistance
- Durability
- Thermal stability

**Technical specifications**

|                           |               |
|---------------------------|---------------|
| Maximum temperature range | 500°C – 600°C |
| Diameter                  | 55mm          |
| Length                    | 100mm         |
