

ref. **52801**

DIESEL INJECTION PRIMER

Function

During the replacement of the injection pump, filters or other parts, it prevents the backflow of fuel into the tank. Subsequent to the assembly of the parts to be replaced, it allows the fuel to be pumped into the injection line.

Advantages

- ✓ Easy to use
- ✓ Light weight

Technical specifications

Weight	120 g
Material	Rubber + plastic
Dimensions	5*5*34 cm
