**SUMMARY**

Our innovative design delivers tightening and loosening torque of up to 3260 Nm, ideal for heavy-duty vehicle applications. It features an enlarged D-shaped handle cavity, improving ergonomics and handling.

Equipped with an advanced pinless clutch mechanism and high-strength housings, this model ensures consistently high torque, offering excellent durability and performance under intensive use. In addition, it includes a combined switch with 6 forward and reverse settings, allowing users to select between tightening and loosening, as well as manage power and adjust speed or torque according to each application's needs.
