

53063

OIL FILTER AND REGULATOR 1/4"

TECHNICAL SPECIFICATIONS

Air intake	1/4"
Maximum pressure	9,5BAR
Operating temperature	5 - 50°C
Weight	0,63Kg
Dimensions (LxWxH)	265x80x75mm

SUMMARY

Ideal for pneumatic applications, it protects equipment by removing impurities and precisely regulating pressure, improving performance and extending system service life. It is a compact and efficient solution to ensure a clean and pressure-controlled compressed air supply.

Technical specifications:

- Fluid type: Compressed air
- Maximum operating pressure: 9.5 bar (135 psi)
- Adjustable outlet pressure range: 0.5 – 8.5 bar (5–125 psi)
- Operating temperature range: 5 – 50 °C
- Air connections: G 1/4"
- Condensate bowl capacity: 150 ml
- Condensate bowl material: Polycarbonate
