HIGH-FLOW BLOW GUN

TECHNICAL SPECIFICATIONS

Air intake	1/4"
Operating pressure	10BAR
Weight	0,20Kg
Dimensions (LxWxH)	160x30x100mm

SUMMARY

Powerful high-flow blow gun designed to efficiently remove dust, chips and debris in workshops, machinery or industrial equipment. Its robust aluminium design with nickel-plated finish ensures durability, corrosion resistance and consistent performance even under intensive use. Ideal for tasks requiring a powerful and precise airflow.

Specifications:

- Body material: Aluminium alloy
- Surface finish: Nickel-plated
- Nozzle: High air volume (high flow)
