## TURBO PRESSURE GAUGE

## TECHNICAL SPECIFICATIONS

Pieces	2
Operating pressure	0,75-3BAR
High-pressure hose length	2m
Weight	0,70Kg
Dimensions (LxWxH)	260x170x60mm

## DETAILS

This turbo pressure tester is an efficient and easy-to-use tool, designed to verify the pressure of the turbocharging system in various vehicles.

It has a measurement range of -1 to 3 BAR (0-30 psi) and an adjustable variation between 0 and 2 bar or up to 30 psi, depending on the turbo and its application.

Its simplified design allows for quick and secure connection, and its 2-meter long hose provides easy access to difficult points. Ideal for professionals requiring accurate and reliable measurements for turbo system diagnostics.
