

ref. 53566

### OIL SUCTION PUMP – 12V

#### Function

This oil extractor is ideal for clean and quick oil changes. It works by connecting the tongs to the car's 12-volt battery. Oil is subtracted from the vehicle's engine through the oil dipstick hole.

#### Advantages

- ✓ Can extract different types of oils (engine, diesel, heating)
- ✓ Useful for general transfers of the indicated liquids
- ✓ Easy to use

#### Technical specifications

Motor	12V D.C.
Power consumption	5A (aprox.)
Sound pressure level	70 dB(A)
Vibration	< 2,5m/s <sup>2</sup>
Max. Flow rate diesel-oil	2 l/min
Max. Flow rate Motor-oil	1 l/min
Inlet tube size	- Length 1,2m - Outside diameter: 6mm
Outlet tube size	- Length: 1,5m - Outside diameter: 12mm

#### Presentation
