

ref. **53929****BATTERY CHARGER 12/24V****Function**

This product is perfect for charging your car battery in no time. It is compact, easy to use and easy to store. It has a power of 150 watts that provides a fast charge.

It incorporates a maintenance cycle with continuous voltage monitoring to keep the battery at the optimum level at all times and avoid overcharging.

**Advantages**

- ✓ Fast charging
- ✓ Compact and easy to carry
- ✓ Light weight

Technical specifications

Maximum voltage	- Input: 100-240VAC 50/60Hz - Output: 14.4V/14.7VDC 7.2A
Maximum power	150W
Load voltage	- Normal 12V batteries: 14.4V - 24V normal batteries: 28.8V - 12V cold or AGM batteries: 14.7V - 24V cold or AGM batteries: 29.4V
Starting voltage	16,5V
Maximum charging current	7,2A
Minimum load current	3,6A
Working temperature	-20 ~ 40°C
Compatible with 12/24V lead acid batteries	Wetted, GEL, MF and AGM
Charging type	8-step automatic mode
Length of power input cable	1,8m
Power output cable length (with clamps)	1,5m
Weight	0,85kg
