PORTABLE CHARGER FOR ELECTRIC CARS: 3.68KW,  
16A, TYPE 2, SINGLE-PHASE

## TECHNICAL SPECIFICATIONS

Power	3,68KW
Voltage	230V
Working current	16A
Tightness / Sealing	IP66
Operating temperature	-25°C/+55°C
Plug type	Monofásico/Single-Phase, Tipo/Type2
Cable lenght	5m
Weight	2,55Kg
Dimensions (LxWxH)	220x90x60mm

The 16A Portable Charging Station with Type 2 Cable is the perfect solution for electric vehicle owners looking for a practical, fast, and safe charging option. Its robust design, universal compatibility, and ease of use make it one of the best options available on the market.

## ADVANTAGES

- **Universal Compatibility:** This charger is fully compatible with a wide range of electric vehicles using the Type 2 standard.
- **LCD Screen and LED Light:** Equipped with an intuitive LCD screen, this charger allows you to monitor the charging status in real-time, including current intensity, voltage, and other relevant data.
- **Charging Intensity and Optimization:** This charger adjusts the current based on the vehicle model and is suitable for electric vehicles that support charging intensities between 10A and 16A.
- **Safety and Reliability:** With overload and short-circuit protection, this charger ensures a safe charging environment for you and your vehicle.
- **Portability:** Its compact and lightweight design allows for easy transport, making it the perfect option for charging your vehicle at home, at work, or even on the go.
- **Easy to Use:** The installation and operation of the charger are simple and straightforward, with no need for advanced technical knowledge.
