

ref. 54102

BABY CAR SEAT ALERT PAD

Function

This product is a pad that is placed on the seat of any model of car seat on the market and alerts us on the cell phone when we move away from the vehicle, but the child is still in the car. When the adult moves about 15 or 20 meters away from the vehicle, an alarm is activated to prevent the child from being left alone in the car.

Advantages

- ✓ Integrated safety sensor
- ✓ Lightweight
- ✓ Practical, safe and comfortable
- ✓ Battery included
- ✓ Operation with application available for IOS / Android
