

ref. 54132

INSULATING FACE SHIELD FOR VOLTAGE WORK

Function

The main function of face shields is to protect the visual organ against dangerous impacts and/or airborne particles, as well as dust, sparks and glare. These well-dimensioned devices must protect against a large number of hazards while providing comfort of use.

Advantages

- ✓ Protective shield for use without helmet
- ✓ Protection against short-circuit electric arcs
- ✓ Size adjustable by adjustment wheel
- ✓ Anti-fog and anti-scratch treatment

Technical specifications

Screen height	20,5cm
Weight	0,4kg
Protection	Class I

Standards

EN 166: 2001
EN 170: 2002
