

ref. 54265

22KW WALL CHARGER 3-PHASE 32A FOR ELECTRIC CARS

Function

Join the future with our fast-charging system for your electric car. Modern and minimalist design. Today with JBM's wall charger you can transform your garage, yard or office parking lot into a user-friendly place for your EV / PHEV.

With the installation of the power meter ref. 16130 the charger is capable of regulating its charging power by calculating the total consumed by the rest of the household appliances in the domestic installation, avoiding overloads and cuts in the domestic network.

Advantages

- ✓ Access control with RFID cards
- ✓ Automatically prevents charging failures and errors
- ✓ Easy charge
