Operating temperature	-30°C/+60°C
Plug type	Trifásico/Three-phase, Tipo/Type 2
Cable lenght	4m
Weight	5,35Kg
Dimensions (LxWxH)	230x230x100mm

JBM Wall Charger - Fast Charging for Electric (EV) / Hybrid (PHEV) Vehicles. Modern and minimalist design that transforms your garage, patio, or parking space into an efficient and accessible charging area.

FEATURES

- Access control with RFID cards for authorized users.
- Automatic prevention of charging failures and errors.
- Three-phase mode for greater efficiency.
- Plug type: Type 2 (standard for electric vehicles).
- IP65 Protection: Dust and water-resistant, ideal for both indoor and outdoor use.

ADVANTAGES

- Fast and efficient charging.
- Easy installation.
- Control and security through RFID.

INCLUDES

- 1 x 22kW wall charger.
- Optional: With power meter ref. 16130, the charger regulates its power to avoid overloading the domestic grid.
