

ref. 54342

PARTS CLEANER MACHINE WITH THERMOSTAT

Description

Machine designed for perfect washing of dirty parts.

It includes a pneumatic gun to clean with solvent and can also be used to dry the parts using compressed air.

Thanks to its closed cabin, the operator is completely protected from splashes and odour of the solvent.

It has a thermostat with which you can adjust the temperature level of the cleaning liquid.

Advantages

- ✓ Includes digital thermostat to increase washing efficiency.
- ✓ Includes light inside the tank for better visualization.

Technical specifications

Tank capacity	8-14L
Air flow	70-120 PSI@5CFM
Cleaning agent Flow rate	0.8L/min
Thermostat maximum temperature	50°C
Tank dimensions	74x56x45.2cm
Dimensions	790x1710x610mm
Weight	46Kg.
