

Ref. 54392**GDI / EFI INJECTOR CLEANER AND TESTER****Description**

This machine allows you to clean and check the correct functioning of GDI and EFI injectors.

Thanks to its microcontroller, the machine can simulate real engine operating conditions, allowing the behaviour of each injector to be observed and possible faults to be detected.

For injector cleaning, it uses ultrasonic cleaning, thus guaranteeing the complete elimination of any residues that may be present in both petrol and diesel injectors. For EFI systems it also includes in-vehicle cleaning mode.

**Advantages**

- ✓ Pressurised air inlet to provide more power and a better cleaning power.
- ✓ Different types of tests to evaluate the performance of the injectors.

Technical specifications

Voltage	220V(50/60Hz)
Ultrasonic cleaner power	60W
Fuel pressure	0.1-10BAR
Air inlet pressure	5-8BAR
Working temperature	-10 ~ 40°C
Working relative humidity	<85%
Weight	18,5Kg

Measures
