Square measure	1/2"
Profile	Hexagonal
Measures	17, 19, 21mm
Maximum torque	115Nm (+/-6%)
Lenght	101mm
Material	CR-MO, Nylon
Weight	1Kg
Dimensions (LxWxH)	125x145x45mm

DETAILS

Hydraulic impact torque cups designed to limit torque to bolts or nuts with impact guns. Their technology allows quick and precise tightening without worrying about exceeding torque, thus avoiding possible costly repairs and saving time in the shop. In addition, the sockets have a Teflon coating to prevent damage to the rim during use, which together make this kit an indispensable tool for any workshop.
