

ref. 54584

BRAKE PISTON WIND BACK TOOL SET

Description

This brake piston retraction kit is ideally suited for resetting them without damage. With both right and left-hand rotation, it allows for central resetting of the brake piston without tilting.

During maintenance work and when changing brake pads, it is necessary to push the brake pistons back into the brake caliper.

Results in no damage to seals, pistons, or holes in the brake caliper.

Advantages

- ✓ Individually adjustable pins
- ✓ Adapter with magnet
- ✓ Eliminates misuse of other tools

Technical Specifications
