## BRAKE BLEEDER WRENCH SET

### **SUMMARY**

This set provides a secure grip on all sides, reducing the risk of rounding off parts. The lift-up design allows easy repositioning without removing the pipe. A one-way valve prevents air from re-entering. High-quality metal ensures a firm brake pedal, enabling one-person operation, often without wheel removal.

Includes 7mm to 12mm wrenches, fitting most bikes, cars, and light commercials.
