

54733

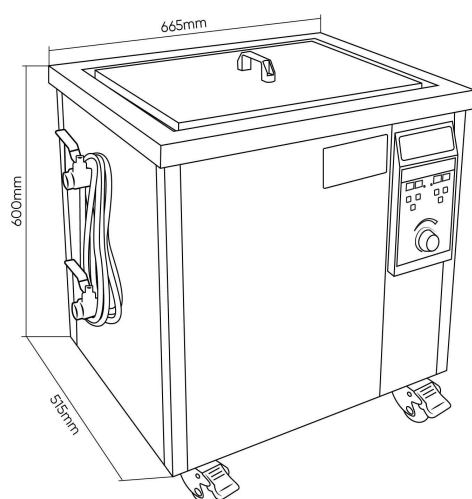

ULTRASONIC CLEANER 53L

TECHNICAL SPECIFICATIONS

Voltage	110-220V
Power	900-1500W
Frequency	50Hz
Frequency of ultrasonic waves	40KHZ
Tank capacity	53L
Number of transducers	18
Timer	1-99min
Operating temperature	20/95°C
Weight	95,00Kg
Tank dimensions	500x350x300mm
Dimensions (LxWxH)	665x515x600mm

SPECIFIC DIMENSIONS

**54733****ULTRASONIC CLEANER 53L****SUMMARY**

This machine allows you to clean parts using ultrasonic waves.

Through the process of cavitation, it generates ultrasonic effects with microscopic bubbles in the cleaning liquid. The result is a thorough and precise cleaning of the parts. Therefore, this cleaner is especially suitable for cleaning components with complex shapes.

It includes a basket for placing the parts, as well as a timer and temperature controller to adjust the cleaning mode.

TECHNICAL SPECIFICATIONS:

- Material: Stainless steel SUS304
- Tank dimensions: 500x350x300mm
- Overall dimensions: 665x515x600mm
